Shareholder Rights Directive Annual Disclosure
for the period January 01, 2024 to December 31, 2024

This disclosure is produced to meet our obligation to provide enhanced reporting under the Shareholder Rights Directive (SRD) requirements. It is not marketing material. This document is solely for the use of professional investors and should not be relied upon by any other person. It is not intended for use by retail clients.

Our Investment Strategy

The aim of the Global Income Growth investment strategy is to deliver two outcomes for clients over the long term: a dependable income stream and real growth in income and capital. We are primarily bottom-up, active investors and invest in companies that we believe can pay dependable dividends across the cycle and also have the prospect of real growth in profits, which will lead to growth in dividends and capital over the long term.

Companies which can do both of these things are not easy to find, but they are highly attractive to a client who needs income today and is also seeking long-term growth in income and capital.

How We Make Investment Decisions

The Global Income Growth team comprises two portfolio managers and four analysts. In addition, the strategy benefits from the insights of a dedicated ESG analyst and of an investigative researcher.

Our fundamental analysis starts with our nine-question research framework, which considers factors such as the long-term sustainability of a company's business model, the earnings growth opportunity, the quality of management, the resilience of dividends and the likely skew of total returns. Every investment idea is robustly tested at a stock discussion, where the team scores companies on four critical factors: growth in long-term cashflow; income level and growth; dependability of dividends; and total return potential.

Portfolio decisions are taken by a consensus vote amongst the investment managers, who have full responsibility for the portfolio. However, based on our sustainability assessment, our ESG analyst has the right of veto over any investment which he believes is inconsistent with a responsible approach.

Our attitude to risk is pragmatic and we consider it from several perspectives. The key risk to our approach is incorrect analysis of company fundamentals. We aim to avoid this by debating all new buy ideas and rigorously challenging investment cases. We also assess the dependability of each company's dividend policy using our Dependability Checklist. To further mitigate the income risk of any one stock, we cap every stock's contribution to the portfolio's underlying income at 5 per cent. Finally, our portfolios are constructed from the bottom up. To avoid excessive concentration of income and capital, we have prudent guidelines to ensure diversification.

Key Material Medium to Long Term Risks

Fundamental risk - the permanent loss of capital and the risk of missing out on companies which subsequently post strong returns. We therefore place significant emphasis in our investment management process on understanding the fundamentals of the companies in which we invest, including environmental, social and governance factors (ESG), which may impact the sustainability of future growth.

Portfolio risk - a failure to maintain an appropriate level of diversification at the strategy level. A series of investment guidelines are in place which are intended to ensure that there is a sufficient level of diversification.

Liquidity risk - a failure to maintain appropriate level of liquidity at the strategy level. We have a series of guidelines that ensure the strategy remains sufficiently liquid to enable positions to be exited or client cash flows to be managed with minimal impact.

Portfolio Composition

The Fund invests in an actively managed and well-diversified portfolio of stocks from around the world. It generally contains 50–80 stocks, and positions at initiation are typically 1–3 per cent of the portfolio. We seek to ensure a high degree of diversification of both income and capital, with no stock representing more than 5 per cent of the portfolio's income stream or capital at the time of purchase.

Turnover and Turnover (Transaction) Costs

	%
Rolling One Year Turnover	20

Rolling One Year Turnover is calculated as the lesser of the sum of all purchases and the sum of all sales in each month divided by the monthly average market value, summed over 12 months. Turnover is a measure of average investment horizon, the lower the turnover the longer the average investment horizon.

Transaction costs:	%
Explicit transaction costs	0.07
Implicit transaction costs	0.01

Explicit costs are directly observable and include broker commissions and transaction taxes and fees. Implicit costs are the indirect costs associated with buying and selling of securities. Specifically, implicit costs represent the differential between the actual transaction price (excluding taxes and commissions) and the mid-market price of the asset when the order to transact was transmitted to a third-party. Due to the methodology used, overall transaction costs may be 'negative' if individual securities are purchased below the prevailing mid-price or conversely sold above the mid-price. Current MiFID II guidance requires us to disclose these costs, even if they result in a negative figure (i.e. an implicit gain to the investor).

Our Governance and Sustainability Approach

We look beyond current financial performance, undertaking proprietary research to build up an in-depth knowledge of an individual company and a view on their long-term prospects, including material governance and sustainability factors which we believe will positively or negatively affect the financial returns of an investment. In keeping with our decentralised and autonomous culture, we are comfortable with our various investment strategies taking different approaches to reach the same goal of properly assessing and weighing up governance and sustainability considerations in the investment process. Further information regarding our approach is detailed in our Governance and Sustainability Principles and Guidelines available in the About Us section of our website.

Our Approach to Voting and Engagement

Thoughtful voting of our clients' holdings is an integral part of our commitment to stewardship. Our Governance and Sustainability team oversees our voting analysis and execution in conjunction with our investment managers. Unlike many of our peers, we do not outsource the responsibility of voting to third-party suppliers. We utilise research from proxy advisers for information only. Additionally, Baillie Gifford does not lend securities on behalf of our clients. Where a client chooses to lend securities, we may consider requesting that clients recall any securities on loan to enable us to vote if we deem a meeting to be significant or contentious.

We engage regularly with management and board members to identify and understand issues and to monitor performance. Analysts from the Governance and Sustainability team regularly join our investors for these meetings, in addition to meetings that they will arrange directly with company representatives to discuss specific issues. Further details of Baillie Gifford's approach to voting and engagement is outlined in our Governance and Sustainability Principles and Guidelines document available in the About Us section of our website.

Detailed below are the engagements and the most significant votes we have carried out.

Company	Meeting Details	Voting Rationale
Analog Devices	Annual 03/13/24 Resolution(s): 4	We supported the shareholder proposal on simple majority voting. We believe that supermajority voting requirements can lead to entrenchment and make it difficult to implement positive corporate government reforms. This resolution is significant because it was submitted by shareholders and received greater than 20 per cent support.
Apple	Annual 02/28/24 Resolution(s): 6	We supported the shareholder proposal on median pay gap reporting, as this would allow for effective measurement of the company's progress on its diversity and inclusion efforts. This resolution is significant because it was submitted by shareholders and received greater than 20 per cent support.

While, in response to the resolution the board committed to reporting adjusted numbers, we believe the company should also report the unadjusted numbers. The unadjusted pay gap is considered the valid way of measuring gender pay inequity by governmental and international agencies and seeks to highlight any structural biases regarding job opportunities. This resolution is significant because it was submitted by shareholders and received greater than 20 per cent support.
Texas Instruments	Annual 04/25/24 Resolution(s): 5	We supported a shareholder resolution to lower the threshold to call special meetings, as we believe that the requested level would strike an appropriate balance between attainability for shareholders and protecting the company from inappropriate use of this right. This resolution is significant because it was submitted by shareholders and received greater than 20 per cent support.
Watsco Inc	Annual 06/03/24 Resolution(s): 1a	We voted in favour of routine proposals at the aforementioned meeting(s). This resolution is significant because it received greater than 20 per cent opposition.

Microsoft	Annual 12/10/24 Resolution(s): 9	We opposed a shareholder resolution requesting a report on risks presented by the unethical or improper usage of external data in the development and training of its artificial intelligence offerings. UPS	Annual 05/02/24 Resolution(s): 1h	We opposed the election of a director who is the Chair of the Nominating and Corporate Governance Committee. A priority engagement with the company for some time, we view UPS' climate ambition to be lagging competitors, with slow progress toward the goals it has in place. As several of the company's largest customers have ambitious scope 3 goals, we view increased ambition on decarbonisation to be a material long-term investment consideration. The vote against this director signals an escalation for our previous voting at the company. This resolution is significant because we identified a material E, S or G issue which resulted in Baillie Gifford opposing management.

Significant Abstentions

Company	Meeting Details	Voting Rationale
Apple	Annual 02/28/24 Resolution(s): 7	We abstained on the AI-related shareholder proposal as we believe that the request for a Transparency Report on the company's use of AI could be harmful to its competitive position and represent an unnecessary bureaucratic cost. Further, we do not see the value of the Report would bring to shareholders. However, we see benefit for Apple to develop and disclose ethical AI principles, since we recognise there to be potential risks and opportunities associated with AI and believe principles can provide guardrails for its responsible development and deployment. We will engage with the company to communicate our position. This resolution is significant because it was submitted by shareholders and received greater than 20 per cent support.
Cognex Corp	Annual 05/01/24 Resolution(s): 3	We abstained on executive compensation as we do not believe the performance conditions are sufficiently stretching.
