### Baillie Gifford Worldwide Long Term Global Growth Fund

#### A sub-fund of the Baillie Gifford Worldwide Funds PLC

#### Third Quarter 2024

#### Fund Aims

The LTGG Team is structured such that every investor can contribute meaningfully to the generation of new ideas, stock research and stock discussions. We want to bring cognitive diversity, creativity and imagination to the research process. Once a stock has been fully researched and discussed, the decision makers are responsible for making the ultimate decision on its inclusion (or otherwise) in the portfolio. Their decisions place an emphasis on backing enthusiasm rather than achieving a full consensus. The LTGG portfolio is deliberately concentrated so the bar is high for any stock to be included in the portfolio. Stocks will typically enter the portfolio as small positions. Thereafter, the bias is towards hold discipline and running winners with a belief that asymmetric returns will drive investment performance.

#### Fees and Charges

Where a share class has not been seeded an estimate of expenses has been used. A schedule of fee and charges is available on request from the manager. Performance fees are not charged.

**Risk Profile**

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

Based on the Class B USD Acc share class.

Please note that even the lowest risk class can lose you money and that extreme adverse market circumstances can mean you suffer severe losses in all cases.

The Fund is classified in the category above because it invests in company shares which generally provide higher rewards and higher risks than other investments such as bonds or cash. Where no share price history is available for any part of the last five years (and thus no returns), the returns of the Fund's comparative index are used in its place to calculate the summary risk indicator.

Collective investments are traded at ruling prices and can engage in borrowing and scrip lending.

The Fund has exposure to foreign currencies and changes in the rates of exchange will cause the value of any investment, and income from it, to fall as well as rise and you may not get back the amount invested.

International investments or investments in foreign securities could be accompanied by additional risks such as potential constraints on liquidity and repatriation of funds, macroeconomic risk, political risk, foreign exchange risk, tax risk, settlement risk as well as potential limitations on the availability of market information.

Custody of assets, particularly in emerging markets, involves a risk of loss if a custodian becomes insolvent or breaches duties of care.

The Fund invests in emerging markets, which includes China, where difficulties with market volatility, political and economic instability including the risk of market shutdown, trading, liquidity, settlement, corporate governance, regulation, legislation and taxation could arise, resulting in a negative impact on the value of your investment.

The Fund's concentrated portfolio relative to similar funds may result in large movements in the share price in the short term.
