Fund Aims

The Worldwide Sustainable Growth Fund aims to invest in companies that sustain meaningful profit growth while making a lasting difference for society. Our investment approach is based on the belief that sustainable investment produces superior returns. We focus on companies capable of maintaining long-term profitable growth, as historical analysis shows they significantly outperform the market. These enduring growth companies are resilient, adaptable, and have the potential to prosper in various environments. Risk Profile

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

Based on the Class B USD Acc share class.

Please note that even the lowest risk class can lose you money and that extreme adverse market circumstances can mean you suffer severe losses in all cases.

The Fund is classified in the category above because it invests in company shares which generally provide higher rewards and higher risks than other investments such as bonds or cash. Where no share price history is available for any part of the last five years (and thus no returns), the returns of the Fund's comparative index are used in its place to calculate the summary risk indicator.

Additional Fund Information

This is a Section 65 approved fund under the Collective Investment Schemes Control Act 45, 2002 (CICS). Sanlam Collective Investments (RF) (Pty) Ltd is the South African Representative Office for this Fund.
