

# Divulgación de información del sitio web de productos financieros: resumen

## Worldwide Discovery Fund

---

### **Sin objetivo de inversión sostenible**

Este producto financiero promueve características medioambientales o sociales, pero no tiene como objetivo una inversión sostenible.

### **Características medioambientales o sociales**

El Fondo promueve las siguientes características medioambientales o sociales:

- Prácticas empresariales responsables de conformidad con los principios del Pacto Mundial de las Naciones Unidas para empresas.
- Estándares medioambientales y sociales mínimos logrados mediante la exclusión de las actividades empresariales que, en opinión del Gestor de Inversiones, sean perjudiciales para el medioambiente y la sociedad.
- Estudio activo de las cuestiones medioambientales y sociales mediante la votación por delegación aplicada de acuerdo con el documento «ESG Principles and Guidelines» (Principios y directrices ESG) de Baillie Gifford.
- Una intensidad de las emisiones de gases de efecto invernadero gestionada, medida de acuerdo con la intensidad media ponderada de carbono (WACI, por sus siglas en inglés) del Fondo, con el objetivo de que sea inferior a la del índice.

Aunque el objetivo del Fondo es tener una WACI inferior a la del índice, este índice no se utiliza como referencia para lograr las características medioambientales o sociales promovidas, ya que el Fondo no adapta sus características medioambientales o sociales a las del índice.

### **Estrategia de inversión**

El Fondo se gestiona de forma activa e invierte principalmente en valores de renta variable con el objetivo de generar rentabilidades atractivas a largo plazo. Los valores de renta variable en los que invierte el Fondo serán, por lo general, empresas de menor tamaño

o de constitución reciente.

La evaluación de la sostenibilidad se tiene en cuenta en el marco de análisis de valores del Gestor de Inversiones. Con el objetivo de identificar empresas que ofrezcan oportunidades de inversión de alto potencial, el Gestor de Inversiones analizará la contribución que la empresa aportará a la sociedad a través de sus productos y servicios para determinar si existe una oportunidad de crecimiento y una ventaja competitiva. Las cuestiones ESG pueden afectar a todos los factores cualitativos que el Gestor de Inversiones considera como parte de un análisis de inversión ascendente: innovación para resolver grandes problemas y reformar el sector; ventaja competitiva emergente; calidad de la gestión, y un modelo de negocio con escalabilidad inherente. Como parte de esto, el Gestor de Inversiones considera si el enfoque comercial de una empresa se ajusta a las expectativas de la sociedad en relación con las preocupaciones ESG para crear un marco que ayude a identificar aquellas empresas que tienen más probabilidades de aportar un verdadero cambio. El Fondo utiliza la evaluación basada en normas, la exclusión en función de la actividad empresarial y la gestión activa para respaldar el logro de las características medioambientales o sociales promovidas. El Gestor de Inversiones aplica una política para evaluar la buena gobernanza en áreas que abarcan las estructuras de buena gestión, las relaciones con los trabajadores, la remuneración del personal y el cumplimiento de las obligaciones fiscales. Las empresas que no superen esta evaluación no formarán parte del Fondo.

Puede consultar más información en el texto completo de la divulgación de información.

### **Proporción de inversiones**

Con el fin de cumplir las características medioambientales o sociales que promueve el Fondo, este invertirá principalmente en valores de renta variable mundiales (directamente, aunque también

podrá invertir indirectamente a través de organismos de inversión colectiva (aptos) que compartan las mismas características. La proporción restante de las inversiones se utilizará con fines de liquidez o gestión eficiente de la cartera y no incluirá ninguna de las características medioambientales o sociales que promueve el Fondo.

Puede consultar más información en el texto completo de la divulgación de información.

### **Seguimiento de las características medioambientales o sociales**

Las características medioambientales o sociales se supervisan interna y externamente de diversas maneras. El Fondo utiliza la evaluación basada en normas, las exclusiones en función de la actividad empresarial y la gestión activa para respaldar el logro de las características medioambientales o sociales promovidas. Estos métodos se implementan continuamente mediante el cumplimiento y el seguimiento constantes de los compromisos vinculantes.

Puede consultar más información en el texto completo de la divulgación de información.

### **Métodos**

Los siguientes indicadores de sostenibilidad se utilizan para medir el logro de las características medioambientales o sociales promovidas:

- El porcentaje de inversiones que cumplen la política del Gestor de Inversiones sobre la evaluación del incumplimiento de los principios del Pacto Mundial de las Naciones Unidas para empresas.
- El porcentaje de inversiones que cumplen con las exclusiones en función de la actividad empresarial.
- El porcentaje de las posiciones votadas.
- La WACI del Fondo es inferior a la del Índice.

Puede consultar más información en el texto completo de la divulgación de información.

### **Fuentes y tratamiento de datos**

El Gestor de Inversiones utiliza una combinación de análisis internos (documentados con información de fuentes públicas divulgada por las empresas en las que se invierte) y fuentes de datos de terceros para lograr cada una de las características medioambientales o sociales que promueve el Fondo.

Puede consultar más información en el texto completo de la divulgación de información.

### **Limitaciones de los métodos y los datos**

El panorama de los datos ESG está avanzando rápidamente, y tanto la calidad como la metodología de los datos se enfrentan actualmente a retos que afectan a todo el sector, tales como la falta de divulgación de información corporativa y la evolución de los requisitos

normativos. Estas limitaciones se mitigan principalmente con la propia investigación interna e implicación activa con las empresas del Gestor de Inversiones, así como mediante la comparación de métricas clave con diferentes proveedores de datos. A causa de esta mitigación, el Gestor de Inversiones considera que la promoción de las características medioambientales y sociales apenas se ha visto alterada.

Puede consultar más información en el texto completo de la divulgación de información.

### **Diligencia debida**

El punto de partida de todas las estrategias de Baillie Gifford es el análisis fundamental ascendente de valores. Este proceso se centra en describir las empresas, el sector en el que operan y su enfoque en cuanto a cuestiones materiales o posibles cuestiones materiales. El acceso a datos externos de proveedores independientes ayuda a describir más detalladamente cada posición, y se valora en gran medida la búsqueda de perspectivas e información de expertos e investigadores externos para ayudar a fundamentar el enfoque del Fondo. Al margen del Fondo, el Gestor de Inversiones aplica continuamente la diligencia debida a toda la actividad empresarial para supervisar los compromisos que se establecen, tal y como se especifica en la sección relativa al seguimiento, bajo la vigilancia de un comité designado.

Puede consultar más información en el texto completo de la divulgación de información.

### **Políticas de implicación**

La supervisión de las inversiones y la implicación que realizamos en nombre de los clientes es un factor esencial de nuestro proceso de inversión y un aspecto fundamental del modo en que ejercemos nuestras responsabilidades administrativas. Este proceso se basa en la amplia participación de gestores de inversiones, analistas de inversión y analistas ESG. Se reúnen con el equipo directivo y otros miembros del personal ejecutivo, jefes de divisiones y miembros no ejecutivos.

Cada año, se divulgará información relativa a las inversiones que estén sujetas a procesos formales de implicación y seguimiento en virtud de la política del Gestor de Inversiones sobre la evaluación del incumplimiento de los principios del Pacto Mundial de las Naciones Unidas para empresas.

Puede encontrar más información sobre la política de implicación del Gestor de Inversiones en el documento «ESG Principles and Guidelines» (Principios y directrices ESG) de Baillie Gifford, que está disponible públicamente en su sitio web.

### **Índice de referencia designado**

No se ha designado ningún índice como índice de referencia para lograr las características medioambientales o sociales que promueve el producto.

## Financial product website disclosure

### Worldwide Discovery Fund

---

**This document provides the investor with detailed information about the fund in relation to the Sustainable Finance Disclosure Regulation ('SFDR'). This is a regulatory document required under SFDR. The information contained in this document is to help the investor understand the sustainability characteristics and/or objectives and risks of this fund. This document should be read in conjunction with other relevant regulatory documentation so the investor can make an informed decision to invest.**

#### **No sustainable investment objective**

This financial product promotes environmental or social characteristics but does not have as its objective a sustainable investment.

#### **Environmental or social characteristics of the financial product**

The Fund promotes the following environmental and/or social characteristics:

- Responsible business practices in accordance with the United Nations Global Compact Principles for Business.
- Minimum environmental and social standards achieved through exclusion of business activities that the Investment Manager has deemed to be harmful to the environment and society.
- Active consideration of environmental and social issues through proxy voting applied in line with Baillie Gifford's ESG Principles and Guidelines document.
- Managed greenhouse gas emissions intensity as measured by the Fund's Weighted Average Carbon Intensity ('WACI') and an aim for this to be lower than the index.

Whilst the Fund aims to have a WACI lower than the index, this index is not used as a reference index to attain the promoted environmental and/or

social characteristics as the Fund does not align its environmental and/or social characteristics with that of the index.

#### **Investment strategy**

The Fund is actively managed and invests primarily in equity securities with the aim of producing attractive long-term returns. The equity securities in which the Fund invests will typically be smaller or younger companies.

The assessment of sustainability is factored into the Investment Manager's stock research framework. In identifying companies which distinguish them as high-potential investment opportunities, the contribution that the company will make to society through its products and services is part of the Investment Manager's analysis as to whether there is a growth opportunity and competitive advantage. ESG matters can impact all of the qualitative factors that the Investment Manager looks at as part of a bottom-up investment analysis: innovation to solve large problems and reshape industry; emerging competitive advantage; management quality; and a business model with inherent scalability. As part of this, the Investment Manager considers whether a company's approach to business aligns with society's expectations in relation to ESG concerns to create a framework to help identify the companies most likely to make a difference.

The Fund will comply with the Investment Manager's policy on assessing breaches of the United Nations Global Compact Principles for Business as outlined in Baillie Gifford's ESG Principles and Guidelines document and will exclude companies that derive:(i) more than 5 per cent. of annual revenues from the production of tobacco; (ii) more than 10 per cent. of annual revenues from Fossil Fuel extraction or production; (iii) more than 20 per cent. of annual

revenues from the production and/or distribution of, electricity generation from, or construction of, thermal coal and directly associated facilities; (iv) more than 10 per cent. of annual revenues or reserves in Arctic exploration or development; or (v) more than 10 per cent. of annual revenues from the production of oil sands or tar sands.

The Investment Manager exerts the right to vote by voting according to its Voting Policy, unless impediments occur (e.g. share blocking). The Investment Manager's Voting Policy is available publicly on its website.

The Fund's WACI will be measured against the Index, with an overall aim to have a WACI that is lower than the Index. Details of the measurement of the Fund's WACI against that of the Index will be provided in the annual report and will include an explanation should this aim not be achieved.

SFDR requires that products promoting environmental and/or social characteristics do not invest in companies who do not follow good governance practices. As such, the Investment Manager has adopted a policy to apply 'good governance tests' on areas covering sound management structures, employee relations, remuneration of staff and tax compliance. Companies that do not pass these tests will not be held in the Fund.

The Investment Manager believes that good governance works best when there are diverse skillsets and perspectives, paired with an inclusive culture and strong independent representation to assist, advise and constructively challenge the thinking of management. However, the Investment Manager also believes that there is no fixed formula to create a constructive and purposeful board but it expects that boards have the resources, information, cognitive and experiential diversity they need to fulfil its responsibilities. More detail on the Investment Manager's policy to assess good governance practices of investee companies can be found in Baillie Gifford's ESG Principles and Guidelines document, which is publicly available on its website.

### Proportion of investment

To meet the environmental and/or social characteristics promoted, the Fund will primarily invest in equity securities (directly although it may also invest indirectly through eligible collective investment schemes) that are aligned with these same characteristics. The remaining proportion of the investments are primarily cash and cash equivalents but may also include investments used for efficient portfolio management purposes (e.g. currency forwards to reduce currency risk). Cash is a residual element of the investment process and as such, it does not affect the promoted environmental and/or social characteristics of the Fund. The assessment of counterparties and issuers for cash management

(including cash and cash equivalents) focuses on creditworthiness of these parties, which can be impacted by sustainability risks.

### Monitoring of environmental or social characteristics

The environmental and/or social characteristics are monitored internally and externally in a variety of ways. The Fund uses norms-based evaluation, business activity-based exclusions and active ownership to support the attainment of the promoted environmental and/or social characteristics and these are implemented on a continuous basis through ongoing compliance with, and monitoring of, the binding commitments. A nominated committee has overall responsibility for ensuring compliance with the environmental and/or social characteristics the Fund is promoting, and exceptions-based reporting is sent to this committee quarterly for challenge and oversight.

- The designated investment restrictions team monitors compliance with the policy on assessing breaches of United Nations Global Compact Principles for Business (norms-based evaluation), working in conjunction with ESG analysts and/or the investment managers and using a third-party data feed (which is updated quarterly), supplemented by internal research.
- Exclusion of business activities deemed harmful to the environment and society (business activity-based exclusions) is monitored by the designated investment restrictions team on a daily basis, working in conjunction with ESG analysts and/or the investment managers and using a live third-party data feed, supplemented by internal research.
- Voting is monitored and actioned by voting analysts as and when votes are due, working in conjunction with other ESG analysts and/or the investment managers and reported to clients on a quarterly basis.
- The Fund's WACI is calculated and monitored against the index on a monthly basis.

### Methodologies

The following sustainability indicators are used to measure the attainment of the promoted environmental and/or social characteristics:

- The % of investments that comply with the Investment Manager's policy on assessing breaches of United Nations Global Compact Principles for Business.
- The % of investments that comply with the business activity-based exclusions.
- The % of holdings voted.
- The Fund's WACI is lower than the Index.

The methodologies in relation to these indicators are outlined below:

**Ethical exclusions – norms – and business activity-based exclusions** The Fund minimises the existence of adverse impacts by formally excluding companies from its investable universe by applying ethical screens: a norms-based evaluation of investee companies, and business activity-based exclusions. Initial negative screening is done using a variety of third-party data sources (such as Sustainalytics and MSCI), supplemented by additional research from ESG analysts and/or investment managers as required.

See the Investment Strategy section for further details on the business activity-based screening applied to the Fund. Holdings which are inconsistent with the business activity-based exclusions will be excluded.

**Norms-based evaluation:** The Fund will assess equities using a norms-based evaluation which is based on the ten principles of the United Nations Global Compact, which cover areas including human rights, labour rights, environmental safeguards and combating bribery and corruption. If a holding is identified as having breached the Principles, based on the Investment Manager's judgement, supported by internal research alongside data feeds from third-party sources, a formal engagement and monitoring process will be implemented. Material improvement is expected within a reasonable timeframe (a maximum of three years), and should a company fail to demonstrate progress then the Fund will divest.

**Voting** ESG analysts oversee voting analysis and execution in conjunction with investment managers and use voting as a tool to consider environmental and/or social issues via stewardship. Unlike many peers, the Investment Manager does not outsource the responsibility for voting to third-party suppliers. Research from proxy advisers is used for information only. The Investment Manager analyses all meetings in-house and endeavours to vote every clients' holdings in all markets (when given voting rights and in line with the Voting Policy outlined in Baillie Gifford's ESG Principles and Guidelines document).

**Greenhouse Gas Intensity** The Fund's weighted average carbon intensity is calculated and measured against the weighted average carbon intensity of the Index, allowing for the greenhouse gas intensity to be managed. Only those investments for which the Investment Manager has estimated or reported figures from its third-party data provider will be included in the calculation of the Fund's weighted average carbon intensity, covering Scope 1, 2 and 3 emissions. Scope 3 emissions will be included in line with PCAF guidance which include a schedule for Scope 3 measurement and disclosure prioritising certain sectors (e.g. oil, gas and mining sectors) ahead of other sectors consistent with the approach of the Supplementing Regulation for EU

Climate Transition Benchmarks and EU Paris-Aligned Benchmarks. As this metric is based on a weighted average, the relevant Fund's portfolio might include single companies with higher intensities provided they do not breach any business activity-based exclusions particularly if these companies represent a small weight within the portfolio.

### Data sources and processing

The Investment Manager uses a combination of internal research (informed by publicly available sources disclosed by investee companies) and third-party data sources to attain each of the environmental and/or social characteristics promoted by the Fund. The environmental and/or social characteristics promoted by the Fund are listed below as well as the data sources.

UN Global Compact policy	Internal proprietary research, public disclosures, Sustainalytics, MSCI
Business activity-based exclusions	Internal proprietary research, public disclosures, Sustainalytics, MSCI
Holdings voted in line with Baillie Gifford's ESG Principles and Guidelines document	Internal proprietary research, aided by Glass Lewis, ISS, BoardEx, Si2, ZD Proxy, liAS, and public disclosures
WACI	MSCI, FactSet

Where data is extracted from third party providers, the Investment Manager evaluates their methodology and coverage at the outset (initial due diligence) and then carries out spot checks of the data each month, escalating issues to the third-party provider where necessary. A dedicated team is tasked with ensuring effective relationships and operational interactions with key third-party providers, recognising that effective use of third-party vendors can support client service and stewardship activities. The level of oversight depends on the nature of the services provided. Providers of critical or important services and those that have access to sensitive data are subject to a vendor management framework.

The Investment Manager is regularly adding more automated quality checking of third-party data. Data metrics required for reporting are currently calculated in house in line with recognised guidance and regulations. The Investment Manager is actively improving data processing, introducing automation where possible and looking for ways to receive and ingest data from a wider set of data providers. However, there is sometimes a reliance on estimated data when it comes to the business activity-based exclusions and WACI commitments of the Fund. Third party-providers occasionally make estimates of revenue exposures relating to business activity-based exclusions where disclosure is lacking; proportionally, less data is estimated than not. Regarding WACI, a large proportion of data is estimated by third-party providers due to general lack of disclosure of Scope 3 emissions.

Due to this the Investment Manager is wary of using third-party data sources as the sole input. Third-party data sources are used to flag any potential issues and to focus work on companies or issues that warrant further attention, at which point thorough analysis is conducted to ensure there is a detailed understanding of the company's current position and its direction of travel towards necessary improvements.

#### **Limitation to methodologies and data**

The ESG data landscape is rapidly developing, and data quality and methodology currently face industry-wide challenges such as lack of corporate disclosures and evolving regulatory requirements. Specifically, the data used in the Fund may be provided by third-party sources and is based on backward-looking analysis, while the subjective nature of ESG criteria means a wide variety of outcomes are possible. There is a risk that the data provided may not adequately address the underlying detail around material ESG considerations. The analysis is also dependent on companies disclosing relevant data and the availability of data can be limited.

These limitations are mitigated primarily through the Investment Manager's own in-house research and active engagement with companies, as well as cross-referencing key metrics against different data providers. Due to this mitigation, the Investment Manager believes that the promotion of the environmental and social characteristics is not appreciably altered.

#### **Due diligence**

The starting point for all Baillie Gifford strategies is bottom-up fundamental stock research. This process focuses on understanding each company, the sector it operates in and their approach to material or likely to be material issues. Investment ideas for inclusion in the strategy will undergo a critical assessment in the form of a question framework that will seek to capture the pertinent investment considerations. Supporting this are bespoke pieces of investment and ESG research that allows the investment managers to easily compare and contrast potential new purchases with competing ideas and existing holdings.

The Fund's investment management approach is focussed on stock-level research and analysis, with the assistance of dedicated sustainability, governance and risk specialists working across the firm. Access to external data from independent providers helps add further detail to understanding each holding, and great value is placed on seeking the perspectives and insights of external experts and researchers to help inform the Fund's approach. This information is used primarily as an aid to engage with companies to ascertain how they

are mitigating risks and maximising opportunities. If it is felt that companies are not making enough progress in mitigating risks, then the option of exercising voting rights in shareholder resolutions and ultimately divesting holdings is retained.

External to the Fund, ongoing due diligence is carried out by the Investment Manager across the business to monitor the commitments being made, as specified in the Monitoring section, with oversight provided by a nominated committee.

#### **Engagement policies**

Engaging with and monitoring investments we make on behalf of clients is an integral element of our investment process, and core to how we discharge our stewardship responsibilities. This process draws on broad involvement from investment managers, investment analysts and ESG analysts. It meets with management and other executive staff, heads of divisions and non-executive board members.

As a patient, active owner, the Investment Manager aims to engage with the companies it invests in on behalf of clients, encouraging a long-term focus and meaningful change when needed. The Investment Manager prefers engagement to divestment, which is typically the tool of last resort. The Investment Manager sets out four primary reasons for engaging with a company: to fact find, to assess progress, to support the management team and to influence. It is important to note that to influence is only one of these four aims. The Investment Manager firmly believes in taking time to understand companies and making its own long-term agenda known to management. This is an important foundation of being responsible holders and, over time, makes it easier to advocate for changes as both sides have a better understanding of and appreciation for what the other party is trying to achieve

On an annual basis, investments that are subject to formal engagement and monitoring processes under the Investment Manager's policy on assessing breaches of United Nations Global Compact Principles for Business will be disclosed.

More information on the Investment Manager's engagement policy can be found within Baillie Gifford's ESG Principles and Guidelines document, which is publicly available on its website.

#### **Designated reference benchmark**

No index has been designated as a reference benchmark to attain the environmental and/or social characteristics promoted by the product.
