About the Company

Baillie Gifford Overseas Growth Funds ICVC (Investment Company with Variable Capital) ('the Company') is an umbrella UK Open-Ended Investment Company ('OEIC') under regulation 14 (Authorisation) of the Open-Ended Investment Companies Regulations 2001. An OEIC is a collective investment vehicle in which your funds are pooled with those of other investors and spread across a portfolio of companies, thus reducing risk.

At 30 April 2023 the Company offered ten sub-funds, and the range may be varied in the future. Each sub-fund is valued on a daily basis. All ten sub-funds are subject to different charging structures and subscription limits. All shares are single priced. Details of the sub-funds and the share classes are contained in the Prospectus, along with details of the switching facility available between sub-funds. The Prospectus was last revised on 28 April 2023 and the Instrument of Incorporation was last revised on 1 November 2021. Copies of the Prospectus or Instrument of Incorporation can be obtained from Baillie Gifford & Co Limited, the Authorised Corporate Director ('ACD') by contacting Client Relations.

The Company is registered in Scotland, registered number SI 000010, and the address of its Head Office is Calton Square, 1 Greenside Row, Edinburgh EH1 3AN. The operation of the Company is governed by the Financial Conduct Authority's Collective Investment Schemes Sourcebook ('COLL') ('the Regulations'), its Instrument of Incorporation and its Prospectus.

The Company's shareholders are not liable for its debts beyond the amount subscribed. Each sub-fund is classed as a UK UCITS retail scheme under COLL.

Any comments expressed in this report should not be taken as a recommendation or advice.

Assessment of value for the Funds

Under COLL 6.6.20R (1), Baillie Gifford & Co Limited, the ACD of the Company, must conduct an assessment at least annually for each UK authorised sub-fund it manages, of whether the payments out of the sub-funds set out in the Prospectus are justified in the context of the overall value delivered to shareholders. This assessment of value must, as a minimum, consider seven criteria, namely: quality of service, performance, authorised fund manager costs, economies of scale, comparable market

rates, comparable services and classes of shares. The ACD will issue the statement of value in a separate composite report, performing the assessment across their full range of UK authorised sub-funds. The ACD has chosen a reference date of 31 March and will publish a composite report by 31 July each year. The latest report as at 31 March 2022 is available on the website at www.bailliegifford.com.

Statement of Authorised Corporate Director's Responsibilities

The Financial Conduct Authority's Collective Investment Schemes Sourcebook ('COLL') requires the Authorised Corporate Director to prepare financial statements for each interim and annual accounting period which give a true and fair view of the financial position of the Company and of its revenue and expenditure and of its net gains and losses on the property of the Company for the period. In preparing the financial statements the Authorised Corporate Director is required to:

- select suitable accounting policies and then apply them consistently;

- make judgements and estimates that are reasonable and prudent;

- comply with the disclosure requirements of the Statement of Recommended Practice relating to the Financial Statements of UK Authorised Funds issued in 2014;

- follow generally accepted accounting principles and applicable accounting standards; including FRS 102 "The Financial Reporting Standard applicable in the UK and the Republic of Ireland";

- keep proper accounting records which enable it to demonstrate that the financial statements as prepared comply with the above requirements;

- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in operation; and

- take reasonable steps for the prevention and detection of fraud and irregularities.

The Authorised Corporate Director is responsible for the management of the Company in accordance with the Instrument of Incorporation, the Prospectus and the Regulations.

The Annual Report and Financial Statements were approved by the Authorised Corporate Director and signed on its behalf by:

M J C Wylie, Chairman
C M Fraser, Director
Baillie Gifford & Co Limited
28 June 2023

Statement of Depositary's Responsibilities and Report of the Depositary to the Shareholders of Baillie Gifford Overseas Growth Funds ICVC ("the Company") for the Year Ended 30 April 2023

The Depositary must ensure that the Company is managed in accordance with the Financial Conduct Authority's Collective Investment Schemes Sourcebook, the Open-Ended Investment Companies Regulations 2001 (SI 2001/1228) (the OEIC Regulations), as amended, the Financial Services and Markets Act 2000, as amended, (together 'the Regulations'), the Company's Instrument of Incorporation and Prospectus (together 'the Scheme documents') as detailed below.

The Depositary must in the context of its role act honestly, fairly, professionally, independently and in the interests of the Company and its investors.

The Depositary is responsible for the safekeeping of all custodial assets and maintaining a record of all other assets of the Company in accordance with the Regulations.

The Depositary must ensure that:

- the Company's cash flows are properly monitored and that cash of the Company is booked into the cash accounts in accordance with the Regulations;
- the sale, issue, redemption and cancellation of shares are carried out in accordance with the Regulations;
- the value of shares in the Company is calculated in accordance with the Regulations;
- any consideration relating to transactions in the Company's assets is remitted to the Company within the usual time limits;
- the Company's income is applied in accordance with the Regulations and;
- the instructions of the Authorised Fund Manager ('the AFM') are carried out (unless they conflict with the Regulations).

The Depositary also has a duty to take reasonable care to ensure that the Company is managed in accordance with the Regulations and the Scheme documents in relation to the investment and borrowing powers applicable to the Company.

Having carried out such procedures as we consider necessary to discharge our responsibilities as Depositary of the Company, it is our opinion, based on the

information available to us and the explanations provided, that in all material respects the Company, acting through the AFM:

- (i) has carried out the issue, sale, redemption and cancellation, and calculation of the price of the Company's shares and the application of the Company's income in accordance with the Regulations and the Scheme documents of the Company, and
- (ii) has observed the investment and borrowing powers and restrictions applicable to the Company.

Independent Auditors' Report to the Shareholders of Baillie Gifford Overseas Growth Funds ICVC

Report on the audit of the financial statements

Opinion

In our opinion, the financial statements of Baillie Gifford Overseas Growth Funds ICVC (the "Company"):

- give a true and fair view of the financial position of the Company and each of the sub-funds as at 30 April 2023 and of the net revenue/expenses and the net capital gains/losses on the scheme property of the Company and each of the sub-funds for the year then ended; and
- have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards, comprising FRS 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland", and applicable law), the Statement of Recommended Practice for UK Authorised Funds, the Collective Investment Schemes sourcebook and the Instrument of Incorporation.

Baillie Gifford Overseas Growth Funds is an Open Ended Investment Company ('OEIC') with ten sub-funds. The financial statements of the Company comprise the financial statements of each of the sub-funds. We have audited the financial statements included within the Annual Report and Financial Statements (the "Annual Report"), which comprise: the balance sheets as at 30 April 2023; the statements of total return and the statements of change in net assets attributable to shareholders for the year then ended; the distribution tables; the accounting policies; and the notes to the financial statements.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) ("ISAs (UK)") and applicable law. Our responsibilities under ISAs (UK) are further described in the Auditors' responsibilities for the audit of the financial statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We remained independent of the Company in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, which includes the FRC's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

Conclusions relating to going concern

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Company's or any sub-funds' ability to continue as a going concern for a period of at least twelve months from the date on which the financial statements are authorised for issue.

In auditing the financial statements, we have concluded that the Authorised Corporate Director's use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

However, because not all future events or conditions can be predicted, this conclusion is not a guarantee as to the Company's and any of the sub-funds' ability to continue as a going concern.

Our responsibilities and the responsibilities of the Authorised Corporate Director with respect to going concern are described in the relevant sections of this report.

Reporting on other information

The other information comprises all of the information in the Annual Report other than the financial statements and our auditors' report thereon. The Authorised Corporate Director is responsible for the other information. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except to the extent otherwise explicitly stated in this report, any form of assurance thereon.

Independent Auditors' Report to the Shareholders of Baillie Gifford Overseas Growth Funds ICVC cont.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If we identify an apparent material inconsistency or material misstatement, we are required to perform procedures to conclude whether there is a material misstatement of the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report based on these responsibilities.

Based on our work undertaken in the course of the audit, the Collective Investment Schemes sourcebook requires us also to report certain opinions as described below.

Authorised Corporate Director's Report

In our opinion, the information given in the Authorised Corporate Directors' Report for the financial year for which the financial statements are prepared is consistent with the financial statements.

Responsibilities for the financial statements and the audit

Responsibilities of the Authorised Corporate Director for the financial statements

As explained more fully in the Statement of Authorised Corporate Director's Responsibilities, the Authorised Corporate Director is responsible for the preparation of the financial statements in accordance with the applicable framework and for being satisfied that they give a true and fair view. The Authorised Corporate Director is also responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Authorised Corporate Director is responsible for assessing the Company's and each of the sub-funds' ability to continue as a going concern, disclosing as applicable, matters related to going concern and using the going concern basis of accounting unless the Authorised Corporate

Director either intends to wind up or terminate the Company or individual sub-fund, or has no realistic alternative but to do so.

Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect material misstatements in respect of irregularities, including fraud. The extent to which our procedures are capable of detecting irregularities, including fraud, is detailed below.

Based on our understanding of the Company/industry, we identified that the principal risks of non-compliance with laws and regulations related to breaches of the Collective Investment Schemes sourcebook, and we considered the extent to which non-compliance might have a material effect on the financial statements, in particular those parts of the sourcebook which may directly impact on the determination of amounts and disclosures in the financial statements. We evaluated management's incentives and opportunities for fraudulent manipulation of the financial statements (including the risk of override of controls), and determined that the principal risks were related to posting inappropriate journal entries to increase revenue or to increase the net asset value of the Company or the sub-funds. Audit procedures performed included:

- Discussions with the Authorised Corporate Director, including consideration of known or suspected instances of non-compliance with laws and regulation and fraud;

Independent Auditors' Report to the Shareholders of Baillie Gifford Overseas Growth Funds ICVC cont.

- Reviewing relevant meeting minutes, including those of the Authorised Corporate Director's board of directors;
- Identifying and testing journal entries, specifically any journals posted as part of the financial year end close process; and
- Designing audit procedures to incorporate unpredictability around the nature, timing or extent of our testing.

There are inherent limitations in the audit procedures described above. We are less likely to become aware of instances of non-compliance with laws and regulations that are not closely related to events and transactions reflected in the financial statements. Also, the risk of not detecting a material misstatement due to fraud is higher than the risk of not detecting one resulting from error, as fraud may involve deliberate concealment by, for example, forgery or intentional misrepresentations, or through collusion.

A further description of our responsibilities for the audit of the financial statements is located on the Financial Reporting Council's website at: www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditors' report.

Use of this report

This report, including the opinions, has been prepared for and only for the Company's shareholders as a body in accordance with paragraph 4.5.12 of the Collective Investment Schemes sourcebook as required by paragraph 67(2) of the Open-Ended Investment Companies Regulations 2001 and for no other purpose. We do not, in giving these opinions, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

Other required reporting

Opinion on matter required by the Collective Investment Schemes sourcebook

In our opinion, we have obtained all the information and explanations we consider necessary for the purposes of the audit.

Collective Investment Schemes sourcebook exception reporting

Under the Collective Investment Schemes sourcebook we are also required to report to you if, in our opinion:

- proper accounting records have not been kept; or
- the financial statements are not in agreement with the accounting records.

We have no exceptions to report arising from this responsibility.

PricewaterhouseCoopers LLP

Accounting Policies

(1) *Basis of accounting*

The financial statements have been prepared under the historical cost basis, as modified by the revaluation of investments and in accordance with UK Generally Accepted Accounting Principles, the Instrument of Incorporation, the Statement of Recommended Practice ('SORP') relating to the Financial Statements of UK Authorised Funds issued in 2014 and the Financial Conduct Authority's Collective Investment Schemes Sourcebook ('COLL'). Unless otherwise stated, accounting policies within these financial statements are consistent with prior year policies.

The financial statements have been prepared on a going concern basis.

FRS 102 requires the Company to disclose, for the financial instruments held, the level within the fair value hierarchy that the fair value measurement of those instruments should be categorised. The fair value hierarchy is as follows:

Level 1: The unadjusted quoted price in an active market for an identical instrument.

Level 2: Valuation techniques using observable inputs other than quoted prices included within Level 1.

Level 3: Valuation techniques using unobservable inputs.

(2) *Recognition of income*

Equities: Dividends on equities are recognised when the security is quoted ex-dividend. The ordinary element of stocks received in lieu of cash dividends is recognised as revenue and, where applicable, is included in the distributions. Special dividends are treated as repayments of capital or revenue depending on the facts of each particular case.

Collective Investment Schemes: Distributions and accumulations from holdings in collective investment schemes are recognised when the scheme units go ex-dividend. Amounts stated as equalisation on units in distributions or reports are treated as a return of capital and deducted from the cost of investment.

Deposits and Other Income: Interest on deposits is accounted for on an accruals basis. Underwriting commission is recognised when the issue takes place. Other income is accounted for on either an accruals or a receipts basis depending on the circumstances of each particular case.

Real Estate Investment Trusts: Distributions from Real Estate Investment Trusts (REITs) are recognised when the security is quoted as ex-dividend. Income is streamed between dividend income and property income distributions as appropriate. Special dividends are treated as repayments of capital or revenue depending on the facts of each particular case.

(3) *Treatment of management expenses*

For all the sub-funds, all management expenses, other than those relating to the purchase and sale of investments and custodian transaction costs, have been allocated against revenue. For all of the sub-funds VAT is written off to the extent that it is not considered to be recoverable.

Where the ACD, at its sole discretion, considers the expenses within a sub-fund to be too high, the ACD may rebate some of those expenses to that sub-fund. Where the ACD pays a rebate to a sub-fund this will reduce the expenses within that sub-fund.

(4) *Allocation of revenue and expenses to share classes*

Revenue is allocated when earned in the proportion of the net asset value of each share class to the total net asset value of the relevant sub-fund. Expenses incurred solely in respect of a share class are allocated directly to that class. Expenses incurred in respect of, or attributable to, the relevant sub-fund as a whole are allocated when incurred in the proportion of the net asset value of each share class to the total net asset value of the relevant sub-fund.

(5) *Distribution policies*

Distributions: All the sub-funds distribute income annually and pay dividend distributions. All sub-funds pay distributions out of income after the deduction of relevant expenses.

Equalisation on units in collective investment schemes: Equalisation declared on distributions/accumulations for units held in collective investment schemes reduces the cost of investment and does not form part of the distribution/accumulation to shareholders.

Accounting Policies cont.

(6) *Taxation*

Corporation tax is charged at 20% of the revenue liable to corporation tax less expenses allocated to revenue. Deferred taxation is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date where transactions or events have occurred at that date that will result in an obligation to pay less or receive more tax. Deferred tax assets are recognised only to the extent that the ACD considers that it is more likely than not that there will be taxable profits from which the underlying timing differences can be deducted. Deferred tax assets are not discounted.

(7) *Basis of valuation of investments*

The investments of the sub-funds have been valued at closing bid prices on 30 April 2023, or the Investment Adviser's valuation where indicated. Investments are valued using the fair value hierarchy, referenced in accounting policy 1.

(8) *Foreign exchange*

All foreign securities and currencies held at the year end have been translated into sterling at the rate of exchange ruling at 30 April 2023. Transactions during the year have been translated at the exchange rate ruling on the transaction date.

Risk Disclosures

General Risk Management Process

The Company's overall risk management process is the responsibility of the ACD. Risks which are specific to the sub-funds are managed by the ACD in accordance with the Risk Management Policy, with oversight by the Depositary. The ACD has established a risk management framework, including a permanent risk management function, to monitor the risks in relation to the sub-funds. Where appropriate, the risk management function builds on the existing parts of the risk management framework of the Investment Advisor to make use of expertise and advice, and avoid unnecessary duplication.

The risk profile of each of the sub-funds is considered by the ACD to determine the nature and extent of risk management procedures and assess the appropriateness of disclosures made to investors. The ACD then considers the material risks facing the sub-funds via the receipt of quarterly reports from the risk management function.

Sub-Fund Risk Profile

The risk profile of a sub-fund is determined using a number of factors including market risk (comprising foreign currency risk, interest rate risk and other price risk), credit risk, liquidity risk and operational risk. As described above, the ACD operates a risk management framework to oversee the risks that the sub-funds are exposed to and assess the sensitivity of a sub-fund's portfolio to these risks. The approach to managing these risks is set out below with oversight and monitoring provided by the ACD's risk management function.

Market Risk

Market risk is the potential for changes in the market value of underlying investments in a sub-fund. This comprises foreign currency risk, interest rate risk and other price risk.

Asset allocation is determined by the Investment Adviser who ensures that the distribution of the sub-funds' assets is appropriate in terms of the investment objectives. Divergence from the target asset allocation is strictly controlled and the portfolio closely monitored in terms of risk.

Derivatives may be used by certain sub-funds of the Company, as specified in the sub-fund's investment objective and policy, for the purposes of hedging (which includes efficient portfolio management). The ACD does not anticipate such use of derivatives having any effect on the overall risk profile of any sub-fund of the company.

The Investment Adviser does not currently use derivatives in any sub-fund and accordingly no value at risk or sensitivity analysis information is given.

Foreign currency risk

The Investment Adviser has identified three principal areas where foreign currency risk could impact the sub-funds, being where movements in exchange rates affect the value of investments, short-term timing differences and the revenue received.

A proportion of the net assets of all the sub-funds are denominated in currencies other than sterling, with the effect that the balance sheet and total return can be affected by currency movements. The balance sheet currency exposure is disclosed in the Notes to the Financial Statements of each sub-fund.

The sub-funds may be subject to short-term exposure to exchange rate movements, for instance where the date of an investment purchase and the date when the settlement occurs are different. To reduce this risk the Investment Adviser will normally execute a foreign currency contract on the transaction date wherever practicable.

The sub-funds may receive revenue in currencies other than sterling and hence movements in exchange rates can affect the sterling value of this revenue. To minimise this risk arrangements are in place to convert all revenue receipts to sterling on, or shortly after, the date of receipt.

Interest rate risk

The majority of the financial assets of the sub-funds are equities and other investments which neither pay interest nor have a maturity date. Therefore, these sub-funds' direct exposure to interest rate risk is not considered to be significant.

Risk Disclosures cont.

Other price risk

Market price risk arises mainly from uncertainty about future prices of the financial instruments held. It represents the potential loss the sub-funds might suffer through holding market positions in the face of price movements.

Investment markets can go down as well as up and market conditions can change rapidly. This means the value of an investor's holding may go down as well as up, and an investor may not recover the amounts invested especially if investments are not held for the long term. A market price decrease applied to the fund would result in a decrease on the net asset value of the Fund and vice versa.

Counterparty credit risk

The Investment Adviser monitors both the creditworthiness of counterparties and the extent to which the counterparty risk is diversified. The organisations with whom derivative transactions can be arranged are either top rated institutions themselves or subsidiaries of such institutions. The aim is to strike a balance between spreading counterparty risk amongst a number of institutions and keeping costs low by achieving economies of scale.

Stock settlement is normally on a delivery versus payment ("DVP") basis where the payment for stock is due at the time of delivery. Where stock settlement is not on a DVP basis, additional procedures are in place and approvals required to manage the settlement risks that may arise.

Liquidity risk

Liquidity risk is the potential that there are insufficiently realisable assets to cater for investor redemptions. Liquidity is managed by the Investment Advisor by taking into account the investment strategy, liquidity profile, and redemption policy of each sub-fund. The level of liquidity maintained by each sub-fund is appropriate to its underlying obligations based on an assessment of the relative liquidity of the sub-fund's assets in the market, taking account of the time required for liquidation and the price or value at which those assets can be liquidated, and their sensitivity to other market risks or factors.

Operational risk

Failure of Baillie Gifford & Co's accounting systems or those of other third party service providers could lead to an inability to provide accurate reporting and monitoring or a misappropriation of assets. Baillie Gifford & Co have a comprehensive business continuity plan which facilitates continued operation of the business in the event of a service disruption or major disaster. The ACD reviews Baillie Gifford & Co's report on internal controls and the reports by other key third party providers.

Fair values

The financial assets and liabilities of the sub-funds are included in the valuation at market value, or at the Investment Adviser's valuation (as indicated in the portfolio statement of the sub-funds). These values have been determined by reference to prices available from the markets on which the instruments are traded.

Remuneration Report

Baillie Gifford & Co ('Baillie Gifford') maintains a Remuneration Policy (the 'Policy') which applies to group companies, including Baillie Gifford & Co Limited (the 'Company'), which is the group's sole UK UCITS management company for the range of UK UCITS operated within the group. The Policy is subject to review on at least an annual basis by the Management Committee of Baillie Gifford & Co and the Board of Baillie Gifford & Co Limited. The 2023 review is currently being carried out and no material changes are expected.

Application of the UK UCITS Remuneration Code

The Company is required to identify individuals whose professional activities have a material impact on the risk profiles of the UK UCITS it manages (known as 'Material Risk Takers'), and the UK UCITS Remuneration Code requirements and disclosures apply to those individuals. The list of Material Risk Takers compiled by the Company principally covers governance and control functions.

The Company delegates portfolio management and certain administration roles to other entities, namely its parent Baillie Gifford and another affiliate Baillie Gifford Overseas Limited. These delegates are not required to comply with the UK UCITS Remuneration Code as they are subject to regulatory requirements on remuneration that are considered equally as effective as those applicable under the UK UCITS Remuneration Code.

General Principles of the UK UCITS Remuneration Code

Baillie Gifford & Co Limited endeavours to reward staff fairly and appropriately for their contribution towards the success of the business and the level of service and performance delivered to its clients. The Policy is designed to be consistent with and promote sound and effective risk management and should not encourage risk-taking which is inconsistent with the risk profiles of the UK UCITS it manages. It is designed to be in line with the Company's strategy, objectives, values and long-term interests, its UK UCITS and investors in such UK UCITS. The Policy has been designed to avoid conflicts of interest and is subject to independent internal review by the Compliance and Business Risk functions. In order to achieve this, the remuneration of staff is reviewed annually, taking into account individual performance and market practice for the role being undertaken.

Governance of Remuneration

Baillie Gifford's Remuneration Policy is overseen by the group's Remuneration Committee. The Remuneration Committee in turn reports to the management body of Baillie Gifford, the Management Committee. The Board of the Company also oversees adherence to the UK UCITS Remuneration Code.

Salary/Bonus Review Process

In terms of the Baillie Gifford group salary review process, the level of salary awarded is influenced by individual performance, the profitability and performance of the firm and the movement in salary levels for the relevant job match within independent survey data utilised by Baillie Gifford. This information is collated and analysed by the Human Resources Department, who submit recommendations on salary awards for each individual member of staff to the Remuneration Committee. The Remuneration Committee may adjust salary awards according to the information provided which will include input from the Compliance, Business Risk and Internal Audit functions on any relevant risk and compliance concerns.

The Management Committee then finalises and authorises the annual salary awards for all staff, and specifically the remuneration of senior officers in the risk management (Business Risk) and Compliance functions.

In terms of variable remuneration, Baillie Gifford operates two arrangements - an Annual Performance Award (APA) and a Long-Term Profit Award (LTPA).

The APA is an annual bonus determined by a range of performance measures that are important to the firm and its clients, with measures generally being shared across the firm, weighted according to the role each member performs. For most, this will be a combination of the firm's Net Promoter Score (NPS) and investment performance. The NPS is taken directly from the annual client survey, operated on the firm's behalf by an independent third party. Investment performance is typically measured on a 5-year basis, with targets and benchmark indices reviewed and agreed annually following consultation with the Remuneration Committee.

In order to reinforce our collegiate culture and our sense of collective responsibility and purpose, the partnership also awards staff a share in its profitability - the LTPA. This will rise and fall alongside the financial performance of the firm, helping to align everyone's interests with those of the firm and also our clients.

Remuneration Report cont.

These arrangements are balanced to achieve an appropriate ratio between fixed pay and variable pay for all roles.

Baillie Gifford operates deferral arrangements whereby a proportion of variable pay for all staff is deferred, the proportions deferred varying between 10% and 50% of variable remuneration depending upon the level of responsibility or role an individual holds. The deferral period is for three years and vests on a pro rata basis with a retention period of six months thereafter. The proportion of variable remuneration which is deferred is held in a selection of Baillie Gifford collective investment schemes.

This deferral arrangement is aligned to Baillie Gifford's longer-term approach as a firm and the long-term investment strategies for clients. Deferring into shares in collective investment schemes managed by Baillie Gifford also aligns the interests of staff in the bonus scheme with the interests and experience of Baillie Gifford's clients generally.

The structure of Baillie Gifford's bonus arrangements also builds in mechanisms to make risk adjustments at a group level for known future losses which are not accounted for at the time bonus levels are set, and also at an individual level, where a member of the bonus scheme is found to have acted inappropriately or taken excessive risks, in order to achieve greater levels of reward.

Further information with respect to the Policy is available at www.bailliegifford.com.

Baillie Gifford & Co Limited Remuneration Code Staff²		
Total remuneration	28	2,760

This remuneration disclosure has been provided at the level of Baillie Gifford & Co Limited as authorised fund manager of UK UCITS, as at 31 March 2022. Remuneration information at an individual AIF or UK UCITS level is not readily available.

¹The total remuneration is the proportion of overall remuneration for Staff as it relates to the time spent on UK UCITS related activity for Baillie Gifford & Co Limited.

²All Material Risk Takers are senior managers or staff engaged in control functions of Baillie Gifford & Co Limited and therefore a breakdown of remuneration between senior management and other risk takers is not applicable.

BAILLIE GIFFORD

Baillie Gifford American Fund

a sub-fund of Baillie Gifford Overseas Growth Funds ICVC

*Annual Report & Financial Statements
for the year ended 30 April 2023*

Baillie Gifford American Fund

Investment Objective

The Fund aims to outperform (after deduction of costs) the S&P 500 Index, as stated in sterling, by at least 1.5% per annum over rolling five-year periods.

Investment Policy

The Fund will invest at least 90% in shares of US companies of any size and in any sector. US companies are companies which are listed, incorporated, domiciled or conduct a significant portion of their business in the US. The Fund may also invest in other transferable securities of US companies and money market instruments. The Fund will be actively managed and will be concentrated.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Market conditions can change rapidly and a fund in any rank can lose you your investment. The Fund is classified as above as it invests in company shares.

The indicator does not take into account the following relevant material risks:

Over shorter time periods the Fund's share price can be volatile and returns can be much higher or lower than our five-year average target. There is no guarantee this objective will be achieved over any time period.

In adverse market conditions it may be difficult to sell investments held by the Fund in a timely manner and their value may fall significantly. This could affect how much money you receive and even delay the selling of your shares if dealing in the Fund is suspended.

Custody of assets involves a risk of loss if a custodian becomes insolvent or breaches duties of care.

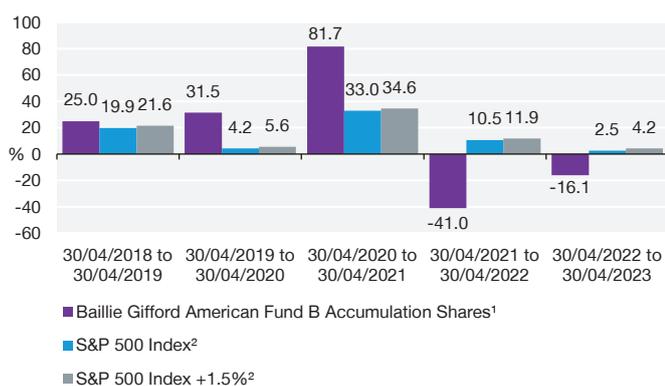

You could lose your investment due to global factors like natural disasters, pandemics, or through developments such as military conflict, or changes in government policies.

Where possible, charges are taken from income. If insufficient, the rest will be taken from capital, reducing the capital value of the Fund.

For a more detailed explanation of the risks, please see the "Risk Warnings" section of the prospectus.

Investment Report

Past Performance

The performance figures shown in this graph are for Class B Accumulation Shares. Performance figures reflect the annual management charge of 0.50%. Performance for the other share classes in issue can be obtained by contacting Client Relations. You should be aware that past performance is not a guide to future performance.

Past Performance

The investment objective of the Fund is to outperform (after deduction of costs) the S&P 500 Index (the 'Index') by at least 1.5% per annum (the 'target return') over rolling five-year periods. For the year to 30 April 2023, the return on B Accumulation Shares was -16.1%³ compared to the Index of 2.5%² and the target return of 4.2%². We fully appreciate that this is tough whether you are a longstanding client or a newer investor in the Fund. While periods of underperformance are inevitable given our style of investment, none of us enjoy these. That said, we believe that short-term performance measurements are of limited relevance in assessing investment ability and would suggest that five years is a more sensible timeframe over which to judge performance. Over that period, the annualised return on B Accumulation Shares was 8.1%³ compared to the return on the Index of 13.5%² and the target return of 15.0%². It is disappointing that over this period the Fund has underperformed its target return. Returns have been impacted by recent, short-term weakness.

Market Environment

In 2022, US stock markets faced challenges due to high inflation, energy security concerns, supply chain issues, and a tight labour market. The Federal Reserve's monetary policy tightening, including interest rate hikes and reduced bond holdings, raised recession concerns and led to falling stock prices. Although energy-related businesses showed strength, they remained a minority. In 2023, positive signs emerged as US annual inflation continued to fall, and growth company valuations began to rebound.

Performance

The Fund experienced negative absolute and relative returns in the 12 months to April 2023, amid a challenging market environment. We understand this has been a difficult period to be invested in the Fund. We remain optimistic about the long-term opportunities for the exceptional growth companies in the Fund, many of which are early in their growth trajectory.

¹Source: FE, 10am dealing prices, income accumulated. ²Source: Revolution and S&P, total return in sterling terms. The target return outperformance is compounded daily therefore the Index return plus the outperformance will not equal the target return. Please see Disclaimer on page 281. ³Source: Baillie Gifford & Co Limited, 10am dealing prices, income accumulated. You should be aware that past performance is not a guide to future performance.

Investment Report cont.

Our stock selections include exposure to innovative healthcare businesses, companies facilitating the shift of consumers and businesses online, those involved in electrifying transport, firms making education more accessible, and businesses supporting local enterprises. The growth prospects of these businesses are more tied to change than overall economic activity.

The largest detractors from relative performance over this period were Tesla, First Republic Bank, and Cloudflare. Tesla experienced a challenging 12 months for its share price, but operationally it has gone from strength to strength. The share price fall appears to be tied to Elon Musk's takeover of Twitter, raising concerns about his attention to Tesla. However, through ongoing engagement with management, we maintain our conviction in Tesla's long-term success.

Cloudflare, which operates a global network of datacentres, saw revenue growth slow slightly and a cautious outlook on future guidance. Despite this, the company's gross margins remain above expectations, operating margins have risen, and it expects to be self-funding this year. This is a position of strength from which to address its vast opportunity.

We sold our long-standing holding in First Republic Bank after the Silicon Valley Bank collapse, as the risks posed to its operations and profitability were severe. Our investment case had been built upon First Republic Bank's ability to use its exemplary service model and conservative lending culture to maintain a stable and low-cost funding base from its depositors. These strengths didn't protect it from a digital bank run. This event serves as a painful reminder of the connections among seemingly unrelated institutions.

Top contributors to relative performance included Shopify, Netflix, and NVIDIA. Shopify, a digital merchant solutions company, adapted to the changing market environment by raising prices for its core product and optimising costs while continuing to invest in core capabilities. The company continues to grow sales and increase its take rate, delivering greater-than-expected profits.

Netflix saw a steep fall in its share price in April 2022 on weak subscriber numbers for the first quarter of 2022, but has since seen continued subscriber growth, a promising advertising-based basic plan, and well-received content. The platform generates healthy profits, distinguishing itself from the broader loss-making streaming industry. As competitors moderate their spending, the content battle in the industry may cool down, further benefiting Netflix.

NVIDIA, a chipmaker specialising in Graphic Processing Units (GPUs), experienced a strong run in share price following October 2022. Sales of the company's products to Data Center customers continue to grow, and operating margins remain strong. The prospect of generative Artificial Intelligence (AI) remains exciting, with massive future demand expected for NVIDIA's GPUs.

In conclusion, we assess the companies in the Fund today to be resilient to the challenges of the current environment. This resilience is built upon access to funding, control over pricing, and control over costs. These factors, combined with our proactive investment approach, provide a strong foundation for sustained growth and enduring value driven by structural change that will continue across various market backdrops.

By focusing on these key areas, we can continue to confidently invest in exceptional businesses that promise long-term success. We remain committed to delivering strong performance for our investors and thank you for your ongoing support during this challenging period.

Notable Transactions

We invested in three new companies during this period: Sweetgreen, the fast-casual restaurant chain that serves healthy salads, Roblox, the online game platform and game creation system, and Doximity, the online networking service for medical professionals.

We sold five companies: Peloton, Teladoc, First Republic Bank, Appian, and Carvana.

¹The Fund incurs broker commission and transfer taxes/stamp duty as a necessary part of buying and selling the Fund's underlying investments in order to achieve the investment objective. In the case of shares; broker commissions, transfer taxes and stamp duty may be paid by the Fund on transactions.

A dilution adjustment is made whenever dealings in the shares of the Fund result in shares being issued or cancelled by the Company. The adjustment will take account of any spread between the buying and selling prices of the Fund's investments and the costs (which may include dealing charges and taxes) of acquiring or disposing of such investments. Please note that the direct transaction cost disclosures above do not include the dilution adjustment charges. For further details on dilution adjustment charges please see the General Information section. For further details on the costs associated with investing in the Fund please see the Enhanced Disclosure of Fund Costs and Charges document and Baillie Gifford's Funds Costs and Charges Summary, both of which are available on the website www.bailliegifford.com.

²As at 30 April 2022 the ACD considered 0.31% to be a more indicative rate for the ongoing charges figure for Class W1 Shares.

³As at 30 April 2022 the ACD considered 0.35% to be a more indicative rate for the ongoing charges figure for Class W3 Shares.

⁴Class W4 Shares were launched on 9 July 2020.

⁵As at 30 April 2023 the ACD considered 0.51% to be a more indicative rate for the ongoing charges figure for Class W4 Shares.

The Fund incurs broker commission and transfer taxes/stamp duty as a necessary part of buying and selling the Fund's underlying investments in order to achieve the investment objective. In the case of shares; broker commissions, transfer taxes and stamp duty may be paid by the Fund on transactions.

Dilution adjustment charges, which do not form part of the direct transaction costs disclosures above, may be incurred as a result of trading in underlying Funds. For further details on dilution adjustment charges please see the General Information section.

Dealing spread is the difference in the buying and selling prices of the underlying investments. Dealing spreads vary considerably depending on the transaction value and market sentiment. The Fund may have holdings in single priced funds. The notional spread on these holdings is not included in the average dealing spread calculated for this Fund.

3 Revenue

	2023	2022
	£'000	£'000
Overseas dividends	4,084	4,373
Bank interest	475	12
Total revenue	4,559	4,385

4 Expenses

	2023	2022
	£'000	£'000
Payable to the ACD, associates of the ACD and agents of either of them:		
Annual management charge	13,146	27,617
Payable to the Depositary, associates of the Depositary and agents of either of them:		
Depositary's fee	191	395
Bank charges	66	153
	257	548
Other expenses:		
Audit fee	6	8
Professional fees	-	6
Total expenses	13,409	28,179

5 Taxation

	2023	2022
	£'000	£'000
Analysis of charge in the year		
Corporation tax	-	-
Overseas tax	613	656
Total taxation	613	656

The Fund is subject to corporation tax at 20% (2022: 20%), however, the majority of dividends received by the Fund are not liable to corporation tax. Accordingly, the tax deductible expenses substantially exceed the taxable income of the Fund and, as a result, there is no corporation tax charge.

At 30 April 2023, the Fund had excess management expenses of £114,397,000 (2022: £101,464,000) which have not been recognised as a deferred tax asset. This is because the Fund is not expected to generate taxable income in a future period in excess of the deductible expenses of that future period and, accordingly, the Fund is unlikely to be able to reduce future tax liabilities through the use of existing excess expenses.

Notes to the Financial Statements cont.

5 Taxation (continued)

The tax charge is explained as follows:

	2023	2022
	£'000	£'000
Net expense before taxation	(8,850)	(23,794)
Net expense before taxation multiplied by the standard rate of corporation tax of 20% (2022: 20%)	(1,770)	(4,759)
Effects of:		
Non-taxable overseas dividends	(817)	(875)
Other income not subject to tax	-	-
Overseas tax on dividends	613	656
Excess management expenses	2,587	5,634
Total taxation	613	656

6 Distributions

	2023	2022
	£'000	£'000
Final to 30 April	333	271
Amounts deducted on cancellation of shares	(1,874)	(4,375)

11 Related party transactions

Baillie Gifford & Co Limited, as ACD, is regarded as a related party by virtue of the services provided to the Company. Baillie Gifford & Co Limited acts as principal in respect of all transactions of shares in the Company, except where stocks are transferred on the issue or cancellation of shares. The aggregate monies received through issue and paid on cancellation are disclosed in the Statement of Change in Net Assets Attributable to Shareholders. Amounts receivable and payable on the issue and cancellation of shares have been disclosed in notes 8 and 10 respectively.

Amounts paid to Baillie Gifford & Co Limited in respect of ACD fees are disclosed in note 4 with amounts due at the year end given in note 10.

Notes to the Financial Statements cont.

14 Derivatives and other financial instruments

Currency exposures

A substantial proportion of the net assets of the Fund are denominated in a currency other than sterling, with the effect that the balance sheet and total return can be significantly affected by currency movements.

Currency	Net currency assets/(liabilities)			Net currency assets/(liabilities)		
	2023			2022		
	Monetary exposures £'000	Non-monetary exposures £'000	Total £'000	Monetary exposures £'000	Non-monetary exposures £'000	Total £'000
UK sterling	(4)	-	(4)	86	-	86
US dollar	13,555	2,572,704	2,586,259	29,038	3,440,064	3,469,102

Short term debtors and creditors have not been disclosed.

Totals may not sum due to rounding.

The Fund invests in a generally diversified portfolio of assets. Consequently the ACD considers that a single measure of market sensitivity does not accurately reflect the risks faced by the Fund.

BAILLIE GIFFORD

Baillie Gifford China Fund

a sub-fund of Baillie Gifford Overseas Growth Funds ICVC

*Annual Report & Financial Statements
for the year ended 30 April 2023*

Baillie Gifford China Fund

Investment Objective

The Fund aims to outperform (after deduction of costs) the MSCI China All Shares Index, as stated in sterling, by at least 2% per annum over five-year rolling periods.

Investment Policy

The Fund will invest at least 90% in the shares of, or depositary receipts representing the shares of, Chinese companies. Chinese companies are companies which are domiciled or conduct a significant part of their operations in China and may be listed on any market. Depositary receipts are transferable securities issued by a bank and which represent the shares of a company. The Fund may also invest in other transferable securities of Chinese companies and money market instruments. The Fund will be actively managed and may invest in companies of any size and in any sector.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Market conditions can change rapidly and a fund in any rank can lose you your investment. The Fund is classified as above as it invests in company shares.

The indicator does not take into account the following relevant material risks:

Over shorter time periods the Fund's share price can be volatile and returns can be much higher or lower than our five-year average target. There is no guarantee this objective will be achieved over any time period.

Investing in China may harm your investment due to difficulties with market volatility, political and economic instability including the risk of market shutdown, trading, liquidity, settlement, corporate governance, regulation, legislation and taxation.

In adverse market conditions it may be difficult to sell investments held by the Fund in a timely manner and their value may fall significantly. This could affect how much money you receive and even delay the selling of your shares if dealing in the Fund is suspended.

Custody of assets involves a risk of loss if a custodian becomes insolvent or breaches duties of care.

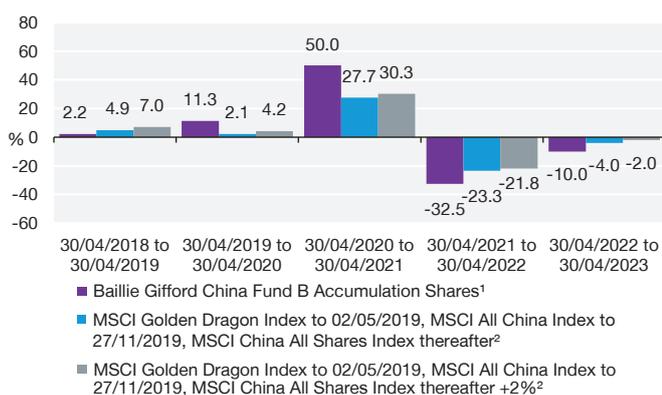

You could lose your investment due to global factors like natural disasters, pandemics, or through developments such as military conflict, or changes in government policies.

Where possible, charges are taken from income. If insufficient, the rest will be taken from capital, reducing the capital value of the Fund.

For a more detailed explanation of the risks, please see the "Risk Warnings" section of the prospectus.

Investment Report

Past Performance

The performance figures shown in this graph are for Class B Accumulation Shares. Performance figures reflect the annual management charge of 0.72%. Performance for the other share classes in issue can be obtained by contacting Client Relations. You should be aware that past performance is not a guide to future performance.

Past Performance

The investment objective of the Fund is to outperform (after deduction of costs) the MSCI China All Shares Index (the ‘Index’) by at least 2% per annum (the ‘target return’) over rolling five-year periods. For the year to 30 April 2023, the return on B Accumulation Shares was -10.0%³ compared to Index of -4.0%² and the target return of -2.0%². We fully appreciate that this is tough whether you are a longstanding client or a newer investor in the Fund. While periods of underperformance are inevitable given our style of investment, none of us enjoy these. That said, we believe that short-term performance measurements are of limited relevance in assessing investment ability and would suggest that five years is a more sensible timeframe over which to judge performance. Over that period, the annualised return on B Accumulation Shares was 0.7%³ compared to the Index of 0.2%² and the target return of 2.2%². It is disappointing that over this period the Fund has underperformed its target return although performance is ahead of the Index. Returns have been impacted by recent, short-term weakness.

Market Environment

After a challenging period for the Chinese stock market for most of 2022, sentiment changed rapidly towards the end of the year. The speed of China’s response to growing domestic frustration over zero-Covid policy and its economic woes surprised many. Beijing also rolled out a series of measures to restore confidence in the property sector. Chinese authorities also allowed access for complete audit inspections into US listed American Depository Receipts (ADRs), removing a significant overhanging threat of companies being forcibly delisted. The Chinese stock market embraced the “reopening” rally at the beginning of 2023 however the rally deflated towards the end of the first quarter. Continued Sino-American tension over chips and balloons could be one thing to blame; waning hope for big bang domestic stimulus could be another.

Our view remains that short-term macroeconomic shifts aren’t necessarily a good guide to stock market direction. A careful understanding of individual

¹Source: FE, 10am dealing prices, income accumulated. ²Source: Revolution and MSCI, total return in sterling terms. The target return outperformance is compounded daily therefore the Index return plus the outperformance will not equal the target return. Please see Disclaimer on page 281. ³Source: Baillie Gifford & Co Limited, 10am dealing prices, income accumulated. You should be aware that past performance is not a guide to future performance.

Investment Report cont.

businesses is vital for long-term returns. As always, we would ask that the Fund is judged on longer, more meaningful timeframes.

Performance

Top contributors to relative return over the period include Zijin Mining (Zijin) and Estun Automation (Estun). Zijin is China's largest miner of gold and copper. 2022 revenue grew by 20% year-over-year and net profit grew by 28%, a record high. We believe Zijin is set to benefit from the supply-demand imbalance in metals and minerals as the world pushes forward the green agenda.

As a small step in the right direction, the company acknowledges various ESG concerns, and is now disclosing an additional 200+ ESG details, and has set goals to achieve carbon peak before 2029 and carbon neutral before 2050. Estun is one of China's leaders in general manufacturing and industrial robots. The growth opportunity here is multi-decade due to China's comparatively low automation levels and rising demand for import substitution. Policy tailwinds should support industry leader Estun, given its strong product quality driven by its better in-house component production capability and a savvy acquisition strategy to enhance competitiveness.

Top detractors to relative return over the period include JD.com and SG Micro. JD.com, one of the major ecommerce players in China, saw slower revenue growth recently. This highlighted a complex macro environment over the last year, as well as cost-cutting and cutting of unprofitable investments, all of which were to be expected. 2022 revenue grew around 10% year over year; net income for 2022 was \$1.5 billion compared to a net loss of roughly \$0.5 billion in 2021. Our thesis on the competitive advantage of JD.com remains largely unchanged. We believe it has a structural advantage in ecommerce logistics, as well as a reputation for quality that others cannot boast. SG Micro is a 'little giant' integrated circuit designer of analog semiconductor chips. The company is taking market share but has been under pressure from short-term worries about pricing pressure as a large overseas competitor ramps up capacity. Short-term cyclical factors have led to a weak

demand outlook given slower than expected demand from smartphone and consumer electronics. This has taken focus away from the long-term secular trends of China's support for growing self-sufficiency in semiconductors and SG Micro's competitive advantages in this space.

Notable Transactions

Two new buys over the period include Centre Testing (CT) and Dongguan Yiheda Automation (Yiheda).

CT provides Testing, Inspection and Certification in China and is the largest private domestic company with less than 2% market share. CT has a scale and reputation advantage to smaller domestic competitors and has a service edge over global ones as well as SoE (state-owned-enterprise) players.

Yiheda specialises in the research, development, and production of factory automation components. It is the leading one-stop shop, providing model parts in its product catalogue that help design engineers save time and reduce cost. We believe the breadth of its product range, the ability to make high quality parts given its web of factories, and its client relationships provide formidable sustainable competitive advantages.

Two notable complete sales over the period include Bilibili and Zai Lab.

We sold Bilibili because of rising concerns about the regulatory backdrop surrounding platforms specifically focused on Generation Z consumers, as well as a view that its monetisation potential was lower and would take longer than we'd previously thought.

We sold the holding in Zai Lab because we decided to marginally reduce our overweight position in healthcare given rising regulatory concerns and geopolitical challenges. We consolidated our healthcare positions in higher conviction holdings and funded better ideas in sectors such as automation and industrial upgrading.

Baillie Gifford & Co, 11 May 2023

¹The Fund incurs broker commission and transfer taxes/stamp duty as a necessary part of buying and selling the Fund's underlying investments in order to achieve the investment objective. In the case of shares; broker commissions, transfer taxes and stamp duty may be paid by the Fund on transactions.

A dilution adjustment is made whenever dealings in the shares of the Fund result in shares being issued or cancelled by the Company. The adjustment will take account of any spread between the buying and selling prices of the Fund's investments and the costs (which may include dealing charges and taxes) of acquiring or disposing of such investments. Please note that the direct transaction cost disclosures above do not include the dilution adjustment charges. For further details on dilution adjustment charges please see the General Information section. For further details on the costs associated with investing in the Fund please see the Enhanced Disclosure of Fund Costs and Charges document and Baillie Gifford's Funds Costs and Charges Summary, both of which are available on the website www.bailliegifford.com.

The Fund incurs broker commission and transfer taxes/stamp duty as a necessary part of buying and selling the Fund's underlying investments in order to achieve the investment objective. In the case of shares; broker commissions, transfer taxes and stamp duty may be paid by the Fund on transactions.

Dilution adjustment charges, which do not form part of the direct transaction costs disclosures above, may be incurred as a result of trading in underlying Funds. For further details on dilution adjustment charges please see the General Information section.

Dealing spread is the difference in the buying and selling prices of the underlying investments. Dealing spreads vary considerably depending on the transaction value and market sentiment. The Fund may have holdings in single priced funds. The notional spread on these holdings is not included in the average dealing spread calculated for this Fund.

3 Revenue

	2023	2022
	£'000	£'000
Overseas dividends	5,697	4,043
Bank interest	43	-
Total revenue	5,740	4,043

Notes to the Financial Statements cont.

4 Expenses

	2023	2022
	£'000	£'000
Payable to the ACD, associates of the ACD and agents of either of them:		
Annual management charge	3,156	4,563
Payable to the Depositary, associates of the Depositary and agents of either of them:		
Depositary's fee	29	42
Bank charges	121	174
	150	216
Other expenses:		
Audit fee	6	7
Non-audit fees paid to auditors	-	2
Professional fees	2	2
	8	11
Total expenses	3,314	4,790

5 Taxation

	2023	2022
	£'000	£'000
Analysis of charge in the year		
Corporation tax	-	-
Overseas tax	418	285
Total taxation	418	285

The Fund is subject to corporation tax at 20% (2022: 20%), however, the majority of dividends received by the Fund are not liable to corporation tax. Accordingly, the tax deductible expenses substantially exceed the taxable income of the Fund and, as a result, there is no corporation tax charge.

At 30 April 2023, the Fund had excess management expenses of £15,189,000 (2022: £11,917,000) which have not been recognised as a deferred tax asset. This is because the Fund is not expected to generate taxable income in a future period in excess of the deductible expenses of that future period and, accordingly, the Fund is unlikely to be able to reduce future tax liabilities through the use of existing excess expenses.

Notes to the Financial Statements cont.

5 Taxation (continued)

The tax charge is explained as follows:

	2023	2022
	£'000	£'000
Net revenue/(expense) before taxation	2,426	(747)
Net revenue before taxation multiplied by the standard rate of corporation tax of 20% (2022: 20%)	485	(149)
Effects of:		
Non-taxable overseas dividends	(1,139)	(809)
Other income not subject to tax	-	-
Overseas tax on dividends	418	285
Excess management expenses	654	958
Total taxation	418	285

6 Distributions

	2023	2022
	£'000	£'000
Final to 30 April	1,950	-
Amounts deducted on cancellation of shares	770	78
Amounts added on issue of shares	(713)	(52)
Total distributions	2,007	26

The distributions take account of revenue transactions on the issue and cancellation of shares. Details of the distributions per share are set out in the Distribution Table.

7 Reconciliation of net revenue to net distributions for the year

	2023	2022
	£'000	£'000
Net revenue/(expense) after taxation for the year	2,008	(1,032)
Add capital transfers for deficits of income	6	1,050
Add distributable revenue brought forward	-	8
Less distributable revenue carried forward	(7)	-
Net distributions for the year	2,007	26

11 Related party transactions

Baillie Gifford & Co Limited, as ACD, is regarded as a related party by virtue of the services provided to the Company. Baillie Gifford & Co Limited acts as principal in respect of all transactions of shares in the Company, except where stocks are transferred on the issue or cancellation of shares. The aggregate monies received through issue and paid on cancellation are disclosed in the Statement of Change in Net Assets Attributable to Shareholders. Amounts receivable and payable on the issue and cancellation of shares have been disclosed in notes 8 and 10 respectively.

Amounts paid to Baillie Gifford & Co Limited in respect of ACD fees are disclosed in note 4 with amounts due at the year end given in note 10.

BAILLIE GIFFORD

Baillie Gifford Developed Asia Pacific Fund

a sub-fund of Baillie Gifford Overseas Growth Funds ICVC

*Annual Report & Financial Statements
for the year ended 30 April 2023*

Baillie Gifford Developed Asia Pacific Fund

Investment Objective

The Fund aims to outperform (after deduction of costs) the MSCI Pacific Index, as stated in sterling, by at least 1.5% per annum over rolling five-year periods.

Investment Policy

The Fund will invest at least 90% directly or indirectly in shares of companies in developed Asia of any size and in any sector. Developed Asian companies are companies which are listed, incorporated, domiciled or conducting a significant portion of their business in Australia, Hong Kong, Japan, New Zealand or Singapore. The indirect investment will be through collective investment schemes. The Fund may also invest in other transferable securities of companies in developed Asia and money market instruments. The Fund will be actively managed.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Market conditions can change rapidly and a fund in any rank can lose you your investment. The Fund is classified as above as it invests in company shares.

The indicator does not take into account the following relevant material risks:

Over shorter time periods the Fund's share price can be volatile and returns can be much higher or lower than our five-year average target. There is no guarantee this objective will be achieved over any time period.

In adverse market conditions it may be difficult to sell investments held by the Fund in a timely manner and their value may fall significantly. This could affect how much money you receive and even delay the selling of your shares if dealing in the Fund is suspended.

Custody of assets involves a risk of loss if a custodian becomes insolvent or breaches duties of care.

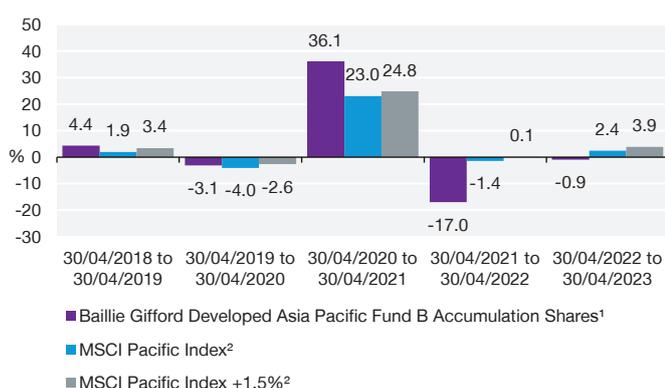

You could lose your investment due to global factors like natural disasters, pandemics, or through developments such as military conflict, or changes in government policies.

Where possible, charges are taken from income. If insufficient, the rest will be taken from capital, reducing the capital value of the Fund.

For a more detailed explanation of the risks, please see the "Risk Warnings" section of the prospectus.

Investment Report

Past Performance

The performance figures shown in this graph are for Class B Accumulation Shares. Performance figures reflect the annual management charge of 0.55%. Performance for the other share classes in issue can be obtained by contacting Client Relations. You should be aware that past performance is not a guide to future performance.

Past Performance

The investment objective of the Fund is to outperform (after deduction of costs) the MSCI Pacific Index (the 'Index') by at least 1.5% per annum (the 'target return') over rolling five-year periods. For the year to 30 April 2023 the return on B Accumulation Shares was -0.9%³ compared to the Index of 2.4%² and the target return of 3.9%². We fully appreciate that this is tough whether you are a longstanding client or a newer investor in the Fund. While periods of underperformance are inevitable given our style of investment, none of us enjoy these. That said, we believe that short-term performance measurements are of limited relevance in assessing investment ability and would suggest that five years is a more sensible timeframe over which to judge performance. Over that period, the annualised return on B Accumulation Shares was 2.5%³ compared to the Index of 4.0%² and the target return of 5.5%². It is disappointing that over this period the Fund has underperformed its target return. Returns have been impacted by recent, short-term weakness.

Market Environment

Inflationary concerns, rate rises, and the financial fallout of tighter conditions have stirred global markets over the last twelve months. Developed Asia has not been immune. These factors have accelerated a style shift towards areas of perceived safety, sucking capital away from some of Asia's most promising growth opportunities.

In more encouraging news, the belated removal of Covid-19 related mobility restrictions within the region has accelerated a recovery in consumption and cross-border travel. As a result, corporates are recalibrating for higher demand with increased capital expenditure. This is expected to provide a healthy tailwind to company earnings and global growth, potentially offsetting the impact of any western contraction.

¹Source: FE, 10am dealing prices, income accumulated. ²Source: Revolution and MSCI, total return in sterling terms. The target return outperformance is compounded daily therefore the Index return plus the outperformance will not equal the target return. Please see Disclaimer on page 281. ³Source: Baillie Gifford & Co Limited, 10am dealing prices, income accumulated. You should be aware that past performance is not a guide to future performance.

Investment Report cont.

Performance

Consumer goods companies have been some of the strongest contributors to performance, as many benefit from a bounce back in consumption. Fast Retailing, the company behind the Uniqlo brand, is restarting its ambitious store rollout plan within China, its largest growth market. Alcoholic beverage businesses Tsingtao Brewery, premium skincare company Shiseido, and Galaxy Entertainment, a Macao casino operator, have all seen their share price rise thanks to a reappraisal of their earnings potential as their key markets reopen.

In contrast, companies that are cyclically exposed to the US market have suffered during the period. James Hardie Industries, a company that has a dominant position in the US, manufacturing and selling fibre cement building products, and Techtronic Industries, a leading manufacturer of power tools which derives a majority of its revenue from North America, have been weak on fears of a slowdown in the US housing market. Recruit Holdings, a world-leading recruitment platform, has fallen in tandem with the decline in employment prospects and job postings in the US, its key market for websites Indeed and Glassdoor. We remain excited about the long-term prospects for Indeed, which should be able to maintain high-single-digit organic growth driven by demographic trends, ongoing share gains, and new product development. Our analysis also suggests a meaningful upside to margins as the business scales. In addition, we believe the company's prodigious cash generation will allow them to weather this cyclical storm and further fuel future inorganic growth and/or share buybacks.

Notable Transactions

During the 12 months we took a new position in Cosmos Pharmaceutical, a leading Japanese discount drugstore with a compelling everyday-low-price model. We expect the company to continue growing through store rollouts and through market share gains from less efficient incumbent supermarkets and independent stores. We

believe that near-term pressures on operating margins due to currency and rising utility costs have created an opportunity to take a holding at a particularly attractive price.

This position was funded from the sale of auto manufacturer Suzuki Motor Corp, on concern that future profitability may come under pressure from rising competition within its key market, India, and Kakaku, which operates price and service comparison websites in Japan, as well as a restaurant listing site, Tabelog. We think that competition in its core markets is likely to increase, and while we note promising new businesses elsewhere in the Kakaku group, we do not think these will be enough to maintain growth at a satisfactory level.

¹The Fund incurs broker commission and transfer taxes/stamp duty as a necessary part of buying and selling the Fund's underlying investments in order to achieve the investment objective. In the case of shares; broker commissions, transfer taxes and stamp duty may be paid by the Fund on transactions.

A dilution adjustment is made whenever dealings in the shares of the Fund result in shares being issued or cancelled by the Company. The adjustment will take account of any spread between the buying and selling prices of the Fund's investments and the costs (which may include dealing charges and taxes) of acquiring or disposing of such investments. Please note that the direct transaction cost disclosures above do not include the dilution adjustment charges. For further details on dilution adjustment charges please see the General Information section. For further details on the costs associated with investing in the Fund please see the Enhanced Disclosure of Fund Costs and Charges document and Baillie Gifford's Funds Costs and Charges Summary, both of which are available on the website www.bailliegifford.com.

The Fund incurs broker commission and transfer taxes/stamp duty as a necessary part of buying and selling the Fund's underlying investments in order to achieve the investment objective. In the case of shares; broker commissions, transfer taxes and stamp duty may be paid by the Fund on transactions.

Notes to the Financial Statements cont.

2 Purchases, sales and transaction costs (continued)

Dilution adjustment charges, which do not form part of the direct transaction costs disclosures above, may be incurred as a result of trading in underlying Funds. For further details on dilution adjustment charges please see the General Information section.

Dealing spread is the difference in the buying and selling prices of the underlying investments. Dealing spreads vary considerably depending on the transaction value and market sentiment. The Fund may have holdings in single priced funds. The notional spread on these holdings is not included in the average dealing spread calculated for this Fund.

Notes to the Financial Statements cont.

5 Taxation

	2023	2022
	£'000	£'000
Analysis of charge in the year		
Corporation tax	-	-
Overseas tax	152	181
Total taxation	152	181

The Fund is subject to corporation tax at 20% (2022: 20%), however, the majority of dividends received by the Fund are not liable to corporation tax. Accordingly, the tax deductible expenses substantially exceed the taxable income of the Fund and, as a result, there is no corporation tax charge.

At 30 April 2023, the Fund had excess management expenses of £6,211,000 (2022: £5,488,000) which have not been recognised as a deferred tax asset. This is because the Fund is not expected to generate taxable income in a future period in excess of the deductible expenses of that future period and, accordingly, the Fund is unlikely to be able to reduce future tax liabilities through the use of existing excess expenses.

The tax charge is explained as follows:

	2023	2022
	£'000	£'000
Net revenue before taxation	2,139	2,232
Net revenue before taxation multiplied by the standard rate of corporation tax of 20% (2022: 20%)	428	446
Effects of:		
Non-taxable UK dividends	(20)	(18)
Non-taxable overseas dividends	(550)	(642)
Other income not subject to tax	(2)	-
Overseas tax on dividends	152	181
Excess management expenses	144	214
Total taxation	152	181

6 Distributions

	2023	2022
	£'000	£'000
Final to 30 April	1,807	1,943
Amounts deducted on cancellation of shares	327	257
Amounts added on issue of shares	(146)	(150)
Total distributions	1,988	2,050

The distributions take account of revenue transactions on the issue and cancellation of shares. Details of the distributions per share are set out in the Distribution Table.

Notes to the Financial Statements cont.

7 Reconciliation of net revenue to net distributions for the year

11 Related party transactions

Baillie Gifford & Co Limited, as ACD, is regarded as a related party by virtue of the services provided to the Company. Baillie Gifford & Co Limited acts as principal in respect of all transactions of shares in the Company, except where stocks are transferred on the issue or cancellation of shares. The aggregate monies received through issue and paid on cancellation are disclosed in the Statement of Change in Net Assets Attributable to Shareholders. Amounts receivable and payable on the issue and cancellation of shares have been disclosed in notes 8 and 10 respectively.

Amounts paid to Baillie Gifford & Co Limited in respect of ACD fees are disclosed in note 4 with amounts due at the year end given in note 10.

The Fund invests in other funds for whom Baillie Gifford & Co, the ultimate parent company of the ACD, act as Investment Adviser and these funds are therefore considered to be related parties. Transactions with these related party funds are noted in the table below.

	2023			2022

BAILLIE GIFFORD

Baillie Gifford Emerging Markets Growth Fund

a sub-fund of Baillie Gifford Overseas Growth Funds ICVC

*Annual Report & Financial Statements
for the year ended 30 April 2023*

Baillie Gifford Emerging Markets Growth Fund

Investment Objective

The Fund aims to outperform (after deduction of costs) the MSCI Emerging Markets Index, as stated in sterling by at least 2% per annum over rolling five-year periods.

Investment Policy

The Fund will invest at least 90% in shares of emerging market companies. Emerging market companies are companies which are listed, incorporated, domiciled or conducting a significant portion of their business in emerging markets and the Fund may invest in companies of any size or in any sector. Emerging markets will be determined by the investment manager at its sole discretion. The Fund may also invest in other transferable securities of emerging market companies and money market instruments. The Fund will be actively managed.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Market conditions can change rapidly and a fund in any rank can lose you your investment. The Fund is classified as above as it invests in company shares.

The indicator does not take into account the following relevant material risks:

Over shorter time periods the Fund's share price can be volatile and returns can be much higher or lower than our five-year average target. There is no guarantee this objective will be achieved over any time period.

Investing in China may harm your investment due to difficulties with market volatility, political and economic instability including the risk of market shutdown, trading, liquidity, settlement, corporate governance, regulation, legislation and taxation.

In adverse market conditions it may be difficult to sell investments held by the Fund in a timely manner and their value may fall significantly. This could affect how much money you receive and even delay the selling of your shares if dealing in the Fund is suspended.

Custody of assets involves a risk of loss if a custodian becomes insolvent or breaches duties of care.

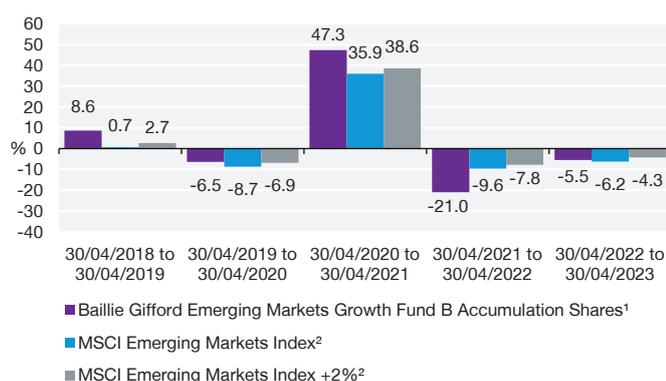

You could lose your investment due to global factors like natural disasters, pandemics, or through developments such as military conflict, or changes in government policies.

Where possible, charges are taken from income. If insufficient, the rest will be taken from capital, reducing the capital value of the Fund.

For a more detailed explanation of the risks, please see the "Risk Warnings" section of the prospectus.

Investment Report

Past Performance

The performance figures shown in this graph are for Class B Accumulation Shares. Performance figures reflect the annual management charge of 0.72%. Performance for the other share classes in issue can be obtained by contacting Client Relations. You should be aware that past performance is not a guide to future performance.

Past Performance

The investment objective of the Fund is to outperform (after deduction of costs) the MSCI Emerging Markets Index (the 'Index') by at least 2% per annum (the 'target return') over rolling five-year periods. For the year to 30 April 2023 the return on B Accumulation Shares was -5.5%³ compared to the Index of -6.2%² and the target return of -4.3%². We fully appreciate that this is tough whether you are a longstanding client or a newer investor in the Fund. While periods of underperformance are inevitable given our style of investment, none of us enjoy these. That said, we believe that short-term performance measurements are of limited relevance in assessing investment ability and would suggest that five years is a more sensible timeframe over which to judge performance. Over that period, the annualised return on B Accumulation Shares was 2.2%³ compared to the Index of 1.2%² and the target return of 3.2%². It is disappointing that over this period the Fund has underperformed its target return although performance is ahead of the Index. Returns have been impacted by recent, short-term weakness.

Market Environment

Investors could be forgiven for losing patience with an asset class that has produced plenty of volatility, but little in the way of excess returns over the last decade. Globally, markets continue to contend with Russia's invasion of Ukraine and its ramifications, and the pace and magnitude of the Federal Reserve's interest rate rises (and the risk of a US recession).

The relatively modest financial stimulus and the monetary response observed across emerging markets in response to the pandemic stands in stark contrast to the many trillions of US dollars desperately deployed by western economies. For much of the developed world, we worry that such profligacy will be a financial burden for years to come, leading to slower growth and unforeseen issues. In contrast, therefore, we view emerging markets as an attractive alternative for capital flows. In recent weeks we've seen the impact of interest rate rises devastating some western banks. As confidence in their health has waned, there's been a run on their deposits and rapid Government intervention as a result.

¹Source: FE, 10am dealing prices, income accumulated. ²Source: Revolution and MSCI, total return in sterling terms. The target return outperformance is compounded daily therefore the Index return plus the outperformance will not equal the target return. Please see Disclaimer on page 281. ³Source: Baillie Gifford & Co Limited, 10am dealing prices, income accumulated. You should be aware that past performance is not a guide to future performance.

Investment Report cont.

Compare this with the emerging markets and the picture looks rather different. The problems we've seen in developed market financials have stemmed from a rapid move away from ZIRP (zero interest rate policy) to higher interest rates and the resultant impact of increasingly mismatched positions within some of the banks. In emerging markets, most banks have been operating against a different backdrop for some time, where rates have been both structurally higher and more volatile.

Performance

Much of what happened over the last year or so has been detrimental to growth stocks and it has been a weak year for performance. The Fund has underperformed in both absolute and in relation to the target return. That said, our investment horizon remains five years and we do take comfort from the fact that the operational performance across the majority of the Fund's holdings has been strong.

MercadoLibre produced good results in 2022 with a strong fourth quarter helping the company to reach new highs across the business, surpassing \$100 billion in total payments volume, \$10 billion of revenue, one billion items shipped through its Mercado Envios logistics business and \$1 billion of Earnings Before Interest and Tax in 2022, all for the first time in its history.

Petrobras was another contributor to performance over the period. It remains the case that the company enjoys some of the lowest lifting costs outside the Middle East and continues to remain highly profitable at current oil price levels.

On the other hand, JD.com (JD), one of the major ecommerce players in China, detracted from performance over the last year. Slower revenue growth and the ongoing RMB10 billion subsidy program has weighed on the share price. In a weaker macro environment, JD turned their focus to lowering costs and increasing efficiencies. Nevertheless, management expect an acceleration in top line growth in 2023 and an improvement in margins. Our thesis on the competitive advantage of this company remains largely unchanged.

We believe it has a structural advantage in ecommerce logistics, as well as a reputation for quality that others cannot boast.

Another detractor over the period is Reliance Industries (Reliance). The short-term fluctuations in oil price, with concerns about a recession in developed markets, obviously impacted stocks in the Energy sector, notably Reliance Industries. Reliance has one of the largest and most complex refineries in the world (as well as some upstream gas fields), but it is in truth a conglomerate; its telecom arm, Reliance Jio has over 400 million mobile subscribers, while Reliance's retail arm is the largest formal player in the market. In addition, Reliance has committed to spending \$10 billion over the next few years to build its green energy division, encompassing wind, solar and hydrogen.

Notable Transactions

Two new buys over the period include Silergy and Delhivery.

Silergy has a speciality in analog chips and is a founder led company with a strong niche competitive advantage. We admire the commitment to R&D and expertise in process technology.

Delhivery is India's leading independent operator of ecommerce fulfilment, alongside broader logistics operations. Its modern operations mean that it has out-competed both traditional incumbents and the in-house operations of Amazon and Flipkart while earning attractive returns.

Two notable sales over the period include Piramal Pharma and Vale.

We sold the holding in Piramal Pharma because we were disappointed by a recent meeting with the management and our view on the growth prospects have diminished.

We sold the holding in Vale (Brazilian metals producer) because our original investment case was based on the potential for Nickel and Copper to become larger parts of the business, and we have a favourable

Investment Report cont.

view on both of these metals. However, more recently we have become concerned about the largest part of the business, the iron ore division.

¹The Fund incurs broker commission and transfer taxes/stamp duty as a necessary part of buying and selling the Fund's underlying investments in order to achieve the investment objective. In the case of shares; broker commissions, transfer taxes and stamp duty may be paid by the Fund on transactions.

A dilution adjustment is made whenever dealings in the shares of the Fund result in shares being issued or cancelled by the Company. The adjustment will take account of any spread between the buying and selling prices of the Fund's investments and the costs (which may include dealing charges and taxes) of acquiring or disposing of such investments. Please note that the direct transaction cost disclosures above do not include the dilution adjustment charges. For further details on dilution adjustment charges please see the General Information section.

For further details on the costs associated with investing in the Fund please see the Enhanced Disclosure of Fund Costs and Charges document and Baillie Gifford's Funds Costs and Charges Summary, both of which are available on the website www.bailliegifford.com.

	2023	2022
	%	%
Average portfolio dealing spread	0.15	0.15

The Fund incurs broker commission and transfer taxes/stamp duty as a necessary part of buying and selling the Fund's underlying investments in order to achieve the investment objective. In the case of shares; broker commissions, transfer taxes and stamp duty may be paid by the Fund on transactions.

Dilution adjustment charges, which do not form part of the direct transaction costs disclosures above, may be incurred as a result of trading in underlying Funds. For further details on dilution adjustment charges please see the General Information section.

Dealing spread is the difference in the buying and selling prices of the underlying investments. Dealing spreads vary considerably depending on the transaction value and market sentiment. The Fund may have holdings in single priced funds. The notional spread on these holdings is not included in the average dealing spread calculated for this Fund.

3 Revenue

	2023	2022
	£'000	£'000
Overseas dividends	57,684	45,166
Bank interest	94	-
Other income	70	-
Total revenue	57,848	45,166

Notes to the Financial Statements cont.

4 Expenses

	2023	2022
	£'000	£'000
Payable to the ACD, associates of the ACD and agents of either of them:		
Annual management charge	6,805	9,449
Payable to the Depositary, associates of the Depositary and agents of either of them:		
Depositary's fee	76	100
Bank charges	735	638
Bank overdraft interest	12	-
	823	738
Other expenses:		
Audit fee	6	7
Non-audit fees paid to auditors	17	19
Professional fees	24	73
	47	99
Total expenses	7,675	10,286

5 Taxation

	2023	2022
	£'000	£'000
Analysis of charge in the year		
Corporation tax	-	-
Overseas tax	2,332	3,809
Total taxation	2,332	3,809

The Fund is subject to corporation tax at 20% (2022: 20%), however, the majority of dividends received by the Fund are not liable to corporation tax. Accordingly, the tax deductible expenses substantially exceed the taxable income of the Fund and, as a result, there is no corporation tax charge.

At 30 April 2023, the Fund had excess management expenses of £31,690,000 (2022: £31,865,000) which have not been recognised as a deferred tax asset. This is because the Fund is not expected to generate taxable income in a future period in excess of the deductible expenses of that future period and, accordingly, the Fund is unlikely to be able to reduce future tax liabilities through the use of existing excess expenses.

Notes to the Financial Statements cont.

5 Taxation (continued)

The tax charge is explained as follows:

	2023	2022
	£'000	£'000
Net revenue before taxation	50,173	34,880
Net revenue before taxation multiplied by the standard rate of corporation tax of 20% (2022: 20%)	10,035	6,976
Effects of:		
Non-taxable overseas dividends	(9,733)	(7,075)
Other income not subject to tax	(14)	-
Overseas tax on dividends	2,332	3,809
Excess management expenses	-	394
Utilisation of excess management expenses	(35)	-
Expense relief claimed on overseas tax	(253)	(295)
Total taxation	2,332	3,809

6 Distributions

	2023	2022
	£'000	£'000
Final to 30 April	36,702	30,256
Amounts deducted on cancellation of shares	13,134	2,156
Amounts added on issue of shares	(1,988)	(1,342)
Total distributions	47,848	31,070

The distributions take account of revenue transactions on the issue and cancellation of shares. Details of the distributions per share are set out in the Distribution Table.

7 Reconciliation of net revenue to net distributions for the year

	2023	2022
	£'000	£'000
Net revenue after taxation for the year	47,841	31,071
Add distributable revenue brought forward	13	12
Less distributable revenue carried forward	(6)	(13)
Net distributions for the year	47,848	31,070

Notes to the Financial Statements cont.

Total other creditors	85,636	6,662

11 Related party transactions

Baillie Gifford & Co Limited, as ACD, is regarded as a related party by virtue of the services provided to the Company. Baillie Gifford & Co Limited acts as principal in respect of all transactions of shares in the Company, except where stocks are transferred on the issue or cancellation of shares. The aggregate monies received through issue and paid on cancellation are disclosed in the Statement of Change in Net Assets Attributable to Shareholders. Amounts receivable and payable on the issue and cancellation of shares have been disclosed in notes 8 and 10 respectively.

Amounts paid to Baillie Gifford & Co Limited in respect of ACD fees are disclosed in note 4 with amounts due at the year end given in note 10.

Notes to the Financial Statements cont.

BAILLIE GIFFORD

Baillie Gifford Emerging Markets Leading Companies Fund

a sub-fund of Baillie Gifford Overseas Growth Funds ICVC

*Annual Report & Financial Statements
for the year ended 30 April 2023*

Baillie Gifford Emerging Markets Leading Companies Fund

Investment Objective

The Fund aims to outperform (after deduction of costs) the MSCI Emerging Markets Index, as stated in sterling, by at least 2% per annum over rolling five year periods.

Investment Policy

The Fund will invest at least 90% in shares of emerging market companies. Emerging market companies are companies which are listed, incorporated, domiciled or conducting a significant portion of their business in emerging markets and the Fund may invest in any sector. Emerging markets will be determined by the investment manager at its sole discretion. The emerging market companies in which the Fund will invest are those having a market capitalisation free float above £1 billion. The Fund may also invest in other transferable securities of emerging market companies and money market instruments. The Fund will be actively managed.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Market conditions can change rapidly and a fund in any rank can lose you your investment. The Fund is classified as above as it invests in company shares.

The indicator does not take into account the following relevant material risks:

Over shorter time periods the Fund's share price can be volatile and returns can be much higher or lower than our five-year average target. There is no guarantee this objective will be achieved over any time period.

Investing in China may harm your investment due to difficulties with market volatility, political and economic instability including the risk of market shutdown, trading, liquidity, settlement, corporate governance, regulation, legislation and taxation.

In adverse market conditions it may be difficult to sell investments held by the Fund in a timely manner and their value may fall significantly. This could affect how much money you receive and even delay the selling of your shares if dealing in the Fund is suspended.

Custody of assets involves a risk of loss if a custodian becomes insolvent or breaches duties of care.

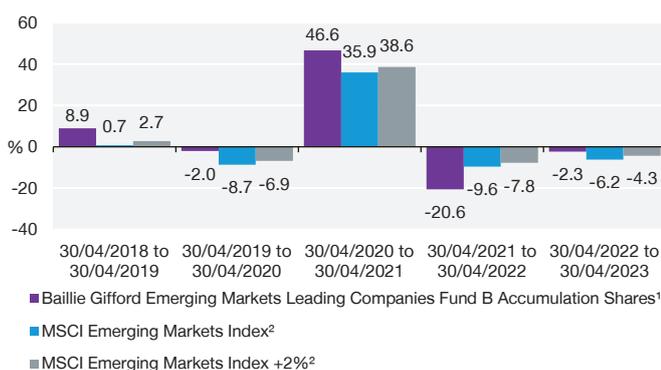

You could lose your investment due to global factors like natural disasters, pandemics, or through developments such as military conflict, or changes in government policies.

Where possible, charges are taken from income. If insufficient, the rest will be taken from capital, reducing the capital value of the Fund.

For a more detailed explanation of the risks, please see the "Risk Warnings" section of the prospectus.

Investment Report

Past Performance

The performance figures shown in this graph are for Class B Accumulation Shares. Performance figures reflect the annual management charge of 0.72%. Performance for the other share classes in issue can be obtained by contacting Client Relations. You should be aware that past performance is not a guide to future performance.

Past Performance

The investment objective of the Fund is to outperform (after deduction of costs) the MSCI Emerging Markets Index (the 'Index') by at least 2% per annum (the 'target return') over rolling five-year periods. For the year to 30 April 2023 the return on B Accumulation Shares was -2.3%³ compared to the Index of -6.2%² and the target return of -4.3%². We believe that short-term performance measurements are of limited relevance in assessing investment ability and would suggest that five years is a more sensible timeframe over which to judge performance. Over that period, the annualised return on B Accumulation Shares was 3.9%³ compared to the Index of 1.2%² and the target return of 3.2%².

Market Environment

Investors could be forgiven for losing patience with an asset class that has produced plenty of volatility, but little in the way of excess returns over the last decade. Globally, markets continue to contend with Russia's

invasion of Ukraine and its ramifications, and the pace and magnitude of the Federal Reserve's interest rate rises (and the risk of a US recession).

The relatively modest financial stimulus and the monetary response observed across emerging markets in response to the pandemic stands in stark contrast to the many trillions of US dollars desperately deployed by western economies. For much of the developed world, we worry that such profligacy will be a financial burden for years to come, leading to slower growth and unforeseen issues. In contrast, therefore, we view emerging markets as an attractive alternative for capital flows. In recent weeks we've seen the impact of interest rate rises devastating some western banks. As confidence in their health has waned, there's been a run on their deposits and rapid Government intervention as a result.

Compare this with the emerging markets and the picture looks rather different. The problems we've seen in developed market financials have stemmed from a rapid move away from ZIRP (zero interest rate policy) to higher interest rates and the resultant impact of increasingly mismatched positions within some of the

¹Source: FE, 10am dealing prices, income accumulated. ²Source: Revolution and MSCI, total return in sterling terms. The target return outperformance is compounded daily therefore the Index return plus the outperformance will not equal the target return. Investment Report cont.

banks. In emerging markets, most banks have been operating against a different backdrop for some time, where rates have been both structurally higher and more volatile.

Performance

Much of what happened over the last year or so has been detrimental to growth stocks and it has been a weak year for performance in absolute terms, but the Fund has outperformed in relative terms. Our investment horizon remains five years and we do take comfort from the fact that the operational performance across the majority of the Fund's holdings has been strong.

MercadoLibre produced good results in 2022 with a strong fourth quarter helping the company to reach new highs across the business, surpassing \$100 billion in total payments volume, \$10 billion of revenue, one billion items shipped through its Mercado Envios logistics business and \$1 billion of Earnings Before Interest and Tax in 2022, all for the first time in its history.

Petrobras was another contributor to performance over the period. It remains the case that the company enjoys some of the lowest lifting costs outside the Middle East and continues to remain highly profitable at current oil price levels.

On the other hand, JD.com (JD), one of the major ecommerce players in China, detracted from performance over the last year. Slower revenue growth and the ongoing RMB10 billion subsidy program has weighed on the share price. In a weaker macro environment, JD turned their focus to lowering costs and increasing efficiencies. Nevertheless, management expect an acceleration in top line growth in 2023 and an improvement in margins. Our thesis on the competitive advantage of this company remains largely unchanged. We believe it has a structural advantage in ecommerce logistics, as well as a reputation for quality that others cannot boast.

Another detractor over the period is Reliance Industries (Reliance). The short-term fluctuations in oil price, with concerns about a recession in developed markets, obviously impacted stocks in the Energy sector,

notably Reliance Industries. Reliance has one of the largest and most complex refineries in the world (as well as some upstream gas fields), but it is in truth a conglomerate; its telecom arm, Reliance Jio has over 400 million mobile subscribers, while Reliance's retail arm is the largest formal player in the market. In addition, Reliance has committed to spending \$10 billion over the next few years to build its green energy division, encompassing wind, solar and hydrogen.

Notable Transactions

Two new buys over the period include Silergy and SK Hynix.

Silergy has a speciality in analog chips and is a founder led company with a strong niche competitive advantage. We admire the commitment to R&D and expertise in process technology.

SK Hynix is one of the world's largest manufacturers of memory semiconductor chips. We remain very enthused about the long-term prospects for the semiconductor industry: demand remains underpinned by the ever-expanding desire to collect and store more data, while escalating capital intensity has underpinned the emergence of a favourable supply side structure, characterised by very high barriers to entry.

Two notable complete sales over the period include Bilibili and Geely Automobile (Geely).

We sold Bilibili because of rising concerns about the regulatory backdrop surrounding platforms specifically focused on Generation Z consumers, as well as a view that its monetisation potential was lower and would take longer than we'd previously thought.

We sold the holding in Geely because we have become increasingly concerned by the company's apparent failure to make much progress on electric vehicles in the last three to five years and are also concerned that the parent company's substantial involvement in global auto M&A in recent years suggests that Geely has fallen down their list of priorities.

¹The Fund incurs broker commission and transfer taxes/stamp duty as a necessary part of buying and selling the Fund's underlying investments in order to achieve the investment objective. In the case of shares; broker commissions, transfer taxes and stamp duty may be paid by the Fund on transactions.

A dilution adjustment is made whenever dealings in the shares of the Fund result in shares being issued or cancelled by the Company. The adjustment will take account of any spread between the buying and selling prices of the Fund's investments and the costs (which may include dealing charges and taxes) of acquiring or disposing of such investments. Please note that the direct transaction cost disclosures above do not include the dilution adjustment charges. For further details on dilution adjustment charges please see the General Information section.

For further details on the costs associated with investing in the Fund please see the Enhanced Disclosure of Fund Costs and Charges document and Baillie Gifford's Funds Costs and Charges Summary, both of which are available on the website www.bailliegifford.com.

²As at 30 April 2023, the ACD considered 0.69% to be a more indicative rate for the ongoing charges figure for Class G Accumulation Shares.

The Fund incurs broker commission and transfer taxes/stamp duty as a necessary part of buying and selling the Fund's underlying investments in order to achieve the investment objective. In the case of shares; broker commissions, transfer taxes and stamp duty may be paid by the Fund on transactions.

Dilution adjustment charges, which do not form part of the direct transaction costs disclosures above, may be incurred as a result of trading in underlying Funds. For further details on dilution adjustment charges please see the General Information section.

Dealing spread is the difference in the buying and selling prices of the underlying investments. Dealing spreads vary considerably depending on the transaction value and market sentiment. The Fund may have holdings in single priced funds. The notional spread on these holdings is not included in the average dealing spread calculated for this Fund.

11 Related party transactions

Baillie Gifford & Co Limited, as ACD, is regarded as a related party by virtue of the services provided to the Company. Baillie Gifford & Co Limited acts as principal in respect of all transactions of shares in the Company, except where stocks are transferred on the issue or cancellation of shares. The aggregate monies received through issue and paid on cancellation are disclosed in the Statement of Change in Net Assets Attributable to Shareholders. Amounts receivable and payable on the issue and cancellation of shares have been disclosed in notes 8 and 10 respectively.

Amounts paid to Baillie Gifford & Co Limited in respect of ACD fees are disclosed in note 4 with amounts due at the year end given in note 10.

BAILLIE GIFFORD

Baillie Gifford European Fund

a sub-fund of Baillie Gifford Overseas Growth Funds ICVC

*Annual Report & Financial Statements
for the year ended 30 April 2023*

Baillie Gifford European Fund

Investment Objective

The Fund aims to outperform (after deduction of costs) the MSCI Europe ex UK Index, as stated in sterling, by at least 1.5% per annum over rolling five-year periods.

Investment Policy

The Fund will invest at least 90% in shares of European companies of any size and in any sector. European companies are companies which are listed, incorporated, domiciled or conducting a significant portion of their business in Europe (including Turkey and excluding the UK). The Fund may also invest in other transferable securities of European companies and money market instruments. The Fund will be actively managed and will be concentrated.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Market conditions can change rapidly and a fund in any rank can lose you your investment. The Fund is classified as above as it invests in company shares.

The indicator does not take into account the following relevant material risks:

Over shorter time periods the Fund's share price can be volatile and returns can be much higher or lower than our five-year average target. There is no guarantee this objective will be achieved over any time period.

In adverse market conditions it may be difficult to sell investments held by the Fund in a timely manner and their value may fall significantly. This could affect how much money you receive and even delay the selling of your shares if dealing in the Fund is suspended.

Custody of assets involves a risk of loss if a custodian becomes insolvent or breaches duties of care.

You could lose your investment due to global factors like natural disasters, pandemics, or through developments such as military conflict, or changes in government policies.

Where possible, charges are taken from income. If insufficient, the rest will be taken from capital, reducing the capital value of the Fund.

For a more detailed explanation of the risks, please see the "Risk Warnings" section of the prospectus.

Adoption of Net Zero Asset Managers initiative

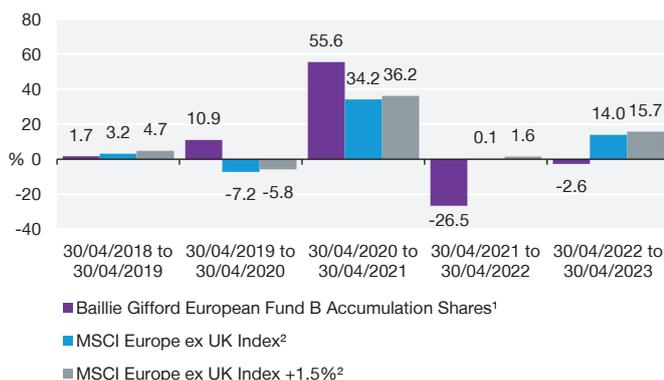

Baillie Gifford & Co, the Fund's Investment Manager, has joined the Net Zero Asset Managers initiative (NZAMi), as part of the Investment Manager's commitment to support the goal of net zero greenhouse gas emissions by 2050, in line with global efforts to limit warming to 1.5°C.

This commitment includes supporting investing aligned with net zero emissions by 2050 or sooner, and the Fund will now be managed in line with and counted towards the Investment Manager's net zero commitment.

As a long-term investor, the Investment Manager's investment process already takes account of the long-term prospects (including long-term sustainability) of an investment. Consideration of climate-related factors and the impact of these on a company's competitive positioning form an integral part of this process. Accordingly, the adoption of NZAMi-aligned targets by the Fund is consistent with the current approach and as such there will be no immediate consequential changes to the current portfolio of the Fund.

Investment Report

Past Performance

The performance figures shown in this graph are for Class B Accumulation Shares. Performance figures reflect the annual management charge of 0.55%. Performance for the other share classes in issue can be obtained by contacting Client Relations. You should be aware that past performance is not a guide to future performance.

Past Performance

The investment objective of the Fund is to outperform (after deduction of costs) the MSCI Europe ex UK Index (the 'Index') by at least 1.5% per annum (the 'target return') over rolling five-year periods. For the year to 30 April 2023 the return on B Accumulation Shares was -2.6%³ compared to the Index of 14.0%² and the target return of 15.7%². We fully appreciate that this is tough whether you are a longstanding client or a newer investor in the Fund. While periods of underperformance are inevitable given our style of investment, none of us enjoy these. That said, we believe that short-term performance measurements are of limited relevance in assessing investment ability and would suggest that five years is a more sensible timeframe over which to judge performance. Over that period, the annualised return on B Accumulation Shares was 4.7%³ compared to the Index of 8.0%² and the target return of 9.6%². It is disappointing that over this period the Fund has underperformed its target return. Returns have been impacted by recent, short-term weakness.

Market Environment

Investing in equity markets has been challenging of late. With macroeconomic matters dominating, stock performance appears to be driven by the oscillations in sentiment over short periods. Our style, as long-term growth investors, has not been in favour, something performance reflects.

In a changeable environment such as this, all an investor can control is the disciplined application of their philosophy and process. Deviation from this task might lead us to investing in fundamentally unattractive businesses in order to chase short-term returns. We believe our edge is as business analysts for the long-term and we think our competitive advantages are greater in periods such as these. We can look through the noise and take advantage of the falling share prices of sustainably growing companies which have prospects of becoming much bigger and more profitable companies in the future.

¹Source: FE, 10am dealing prices, income accumulated. ²Source: Revolution and MSCI, total return in sterling terms. The target return outperformance is compounded daily therefore the Index return plus the outperformance will not equal the target return. Please see Disclaimer on page 281. ³Source: Baillie Gifford & Co Limited, 10am dealing prices, income accumulated. You should be aware that past performance is not a guide to future performance.

Investment Report cont.

Performance

The Fund significantly underperformed over the year, something which has weighed on longer term return figures.

The most significant detractors over the period included Kingspan, Avanza Bank and Just Eat Takeaway.com. Kingspan, the Irish company which manufactures construction materials, has performed exceptionally well in the past few years but its share price has fallen more recently due to signs of cyclical weakness. The longer-term tailwinds remain in place for Kingspan as society pushes for greater energy efficiency in buildings. Avanza Bank, Sweden's leading online savings platform, has seen its growth rate normalise somewhat after a brokerage boom through the pandemic. As a result, its shares fell over the period. However, it remains on track to take further market share in Swedish savings, both by attracting new customers as well as increasing its share of wallet with existing customers. Just Eat Takeaway.com has also seen a normalisation in growth but the main drivers of its poor share price performance have been the overhang of a bad acquisition, in the form of GrubHub, and its unprofitable status.

Positive contributions have come from Prosus, Allegro and Richemont. Prosus, an investment company with a significant stake in Chinese company Tencent, performed well in share price terms with fears around the Chinese regulatory environment easing and the company's share buyback programme being well received by investors. Allegro, which is Poland's leading ecommerce marketplace, also performed well. Encouragingly for Allegro, its competition in the form of Amazon and Shopee have shown signs of retrenchment, enabling Allegro to further establish its dominance. Meanwhile Richemont, the luxury goods conglomerate, contributed to performance with the company producing strong growth, both in revenue and in profitability, particularly from its jewellery segment.

Notable Transactions

New purchases over the period included AutoStore, which designs automated cubic storage and retrieval systems for warehouses, Evotec, a contract research organisation, and CRISPR Therapeutics, a gene editing platform which has submitted a treatment for sickle cell disease for regulatory approval. Complete sales included Ubisoft, the gaming company, Rational, a manufacturer of commercial combi-ovens, and Kuehne & Nagel, a freight forwarder.

¹The Fund incurs broker commission and transfer taxes/stamp duty as a necessary part of buying and selling the Fund's underlying investments in order to achieve the investment objective. In the case of shares; broker commissions, transfer taxes and stamp duty may be paid by the Fund on transactions.

A dilution adjustment is made whenever dealings in the shares of the Fund result in shares being issued or cancelled by the Company. The adjustment will take account of any spread between the buying and selling prices of the Fund's investments and the costs (which may include dealing charges and taxes) of acquiring or disposing of such investments. Please note that the direct transaction cost disclosures above do not include the dilution adjustment charges. For further details on dilution adjustment charges please see the General Information section. For further details on the costs associated with investing in the Fund please see the Enhanced Disclosure of Fund Costs and Charges document and Baillie Gifford's Funds Costs and Charges Summary, both of which are available on the website www.bailliegifford.com.

The Fund incurs broker commission and transfer taxes/stamp duty as a necessary part of buying and selling the Fund's underlying investments in order to achieve the investment objective. In the case of shares; broker commissions, transfer taxes and stamp duty may be paid by the Fund on transactions.

Dilution adjustment charges, which do not form part of the direct transaction costs disclosures above, may be incurred as a result of trading in underlying Funds. For further details on dilution adjustment charges please see the General Information section.

Dealing spread is the difference in the buying and selling prices of the underlying investments. Dealing spreads vary considerably depending on the transaction value and market sentiment. The Fund may have holdings in single priced funds. The notional spread on these holdings is not included in the average dealing spread calculated for this Fund.

3 Revenue

	2023	2022
	£'000	£'000
Overseas dividends	13,661	20,644
Bank interest	228	18
Total revenue	13,889	20,662

4 Expenses

	2023	2022
	£'000	£'000
Payable to the ACD, associates of the ACD and agents of either of them:		
Annual management charge	5,305	15,321
Payable to the Depositary, associates of the Depositary and agents of either of them:		
Depositary's fee	67	158
Bank charges	156	446
	223	604
Other expenses:		
Audit fee	6	6
Professional fees	17	-
	23	6
Total expenses	5,551	15,931

5 Taxation

	2023	2022
	£'000	£'000
Analysis of charge in the year		
Corporation tax	-	-
Overseas tax	1,220	1,475
Prior year tax reclaims written off	767	-
Tax recoverable on overseas dividends	(68)	(16)
Total taxation	1,919	1,459

The Fund is subject to corporation tax at 20% (2022: 20%), however, the majority of dividends received by the Fund are not liable to corporation tax. Accordingly, the tax deductible expenses substantially exceed the taxable income of the Fund and, as a result, there is no corporation tax charge.

Notes to the Financial Statements cont.

5 Taxation (continued)

At 30 April 2023, the Fund had excess management expenses of £46,651,000 (2022: £41,329,000) which have not been recognised as a deferred tax asset. This is because the Fund is not expected to generate taxable income in a future period in excess of the deductible expenses of that future period and, accordingly, the Fund is unlikely to be able to reduce future tax liabilities through the use of existing excess expenses.

The tax charge is explained as follows:

	2023	2022
	£'000	£'000
Net revenue before taxation	8,338	4,731
Net revenue before taxation multiplied by the standard rate of corporation tax of 20% (2022: 20%)	1,667	946
Effects of:		
Non-taxable overseas dividends	(2,732)	(4,129)
Other income not subject to tax	-	-
Overseas tax on dividends	1,220	1,475
Excess management expenses	1,065	3,183
Prior year tax reclaims written off	767	-
Tax recoverable on overseas dividends	(68)	(16)
Total taxation	1,919	1,459

6 Distributions

	2023	2022
	£'000	£'000
Final to 30 April	2,846	4,098
Amounts deducted on cancellation of shares	4,045	(26)
Amounts added on issue of shares	(445)	(681)
Total distributions	6,446	3,391

The distributions take account of revenue transactions on the issue and cancellation of shares. Details of the distributions per share are set out in the Distribution Table.

7 Reconciliation of net revenue to net distributions for the year

	2023	2022
	£'000	£'000
Net revenue after taxation for the year	6,419	3,272
Add capital transfers for deficits of income	27	120

11 Related party transactions

Baillie Gifford & Co Limited, as ACD, is regarded as a related party by virtue of the services provided to the Company. Baillie Gifford & Co Limited acts as principal in respect of all transactions of shares in the Company, except where stocks are transferred on the issue or cancellation of shares. The aggregate monies received through issue and paid on cancellation are disclosed in the Statement of Change in Net Assets Attributable to Shareholders. Amounts receivable and payable on the issue and cancellation of shares have been disclosed in notes 8 and 10 respectively.

Amounts paid to Baillie Gifford & Co Limited in respect of ACD fees are disclosed in note 4 with amounts due at the year end given in note 10.

Notes to the Financial Statements cont.

BAILLIE GIFFORD

Baillie Gifford Global Discovery Fund

a sub-fund of Baillie Gifford Overseas Growth Funds ICVC

*Annual Report & Financial Statements
for the year ended 30 April 2023*

Baillie Gifford Global Discovery Fund

Investment Objective

The Fund aims to outperform (after deduction of costs) the S&P Global Small Cap Index, as stated in sterling, by at least 2% per annum over rolling five-year periods.

Investment Policy

The Fund will invest at least 90% in shares of companies in any country and in any sector which typically at the time of initial purchase have a market capitalisation of US\$10 billion or less. The Fund may also invest in other transferable securities of companies anywhere in the world and money market instruments. The Fund will be actively managed.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Market conditions can change rapidly and a fund in any rank can lose you your investment. The Fund is classified as above as it invests in company shares.

The indicator does not take into account the following relevant material risks.

Over shorter time periods the Fund's share price can be volatile and returns can be much higher or lower than our five-year average target. There is no guarantee this objective will be achieved over any time period.

Investing in China may harm your investment due to difficulties with market volatility, political and economic instability including the risk of market shutdown, trading, liquidity, settlement, corporate governance, regulation, legislation and taxation.

In adverse market conditions it may be difficult to sell investments held by the Fund in a timely manner and their value may fall significantly. This could affect how much money you receive and even delay the selling of your shares if dealing in the Fund is suspended.

Custody of assets involves a risk of loss if a custodian becomes insolvent or breaches duties of care.

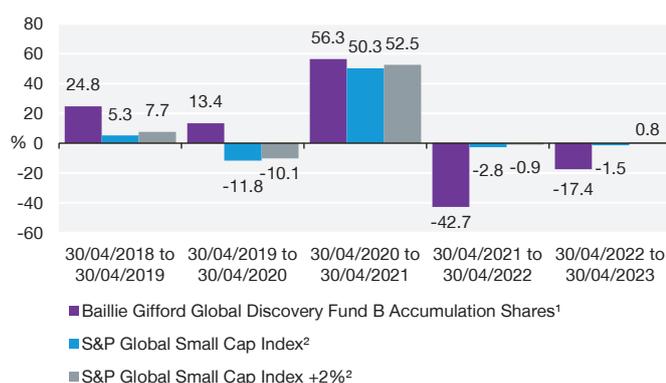

You could lose your investment due to global factors like natural disasters, pandemics, or through developments such as military conflict, or changes in government policies.

Where possible, charges are taken from income. If insufficient, the rest will be taken from capital, reducing the capital value of the Fund.

For a more detailed explanation of the risks, please see the "Risk Warnings" section of the prospectus.

Investment Report

Past Performance

The performance figures shown in this graph are for Class B Accumulation Shares. Performance figures reflect the annual management charge of 0.75%. Performance for the other share classes in issue can be obtained by contacting Client Relations. You should be aware that past performance is not a guide to future performance.

Past Performance

The investment objective of the Fund is to outperform (after deduction of costs) the S&P Global Small Cap Index (the 'Index') by at least 2% per annum (the 'target return') over rolling five-year periods. For the year to 30 April 2023 the return on B Accumulation Shares was -17.4%³ compared to the Index of -1.5%² and the target return of 0.8%². We fully appreciate that this is tough whether you are a longstanding client or a newer investor in the Fund. While periods of underperformance are inevitable given our style of investment, none of us enjoy these. That said, we believe that short-term performance measurements are of limited relevance in assessing investment ability and would suggest that five years is a more sensible timeframe over which to judge performance. Over that period, the annualised return on B Accumulation Shares was 0.9%³ compared to the Index of 6.0%² and the target return of 8.1%². It is disappointing that over this period the Fund has underperformed its target return. Returns have been impacted by recent, short-term weakness.

Market Environment

The broad investing backdrop remains heavily influenced by macroeconomic and geopolitical challenges that have unhelpfully preoccupied the agenda for much of the past year. Optimism is growing that inflation may have peaked, even if it's set to remain elevated. It does at least now feel that some of the disaster scenarios on interest rates are off the table, providing an underpinning to valuations.

That said, we expect investor attention over the coming period to be stubbornly focused on the issues of economic slowdown and second-guessing central bank actions as the path forward becomes more apparent. At the corporate level, the response to heightened uncertainty has generally been to batten down the hatches regarding operational activities (workforce reductions, preserving cash runways, reshoring and better resilience in supply chains etc.) alongside a repositioning of balance sheets (retiring expensive debt, opportunistic buybacks if flexibility allows).

¹Source: FE, 10am dealing prices, income accumulated. ²Source: Revolution and S&P, total return in sterling terms. The target return outperformance is compounded daily therefore the Index return plus the outperformance will not equal the target return. Please see Disclaimer on page 281. ³Source: Baillie Gifford & Co Limited, 10am dealing prices, income accumulated. You should be aware that past performance is not a guide to future performance.

Investment Report cont.

Performance

The bottom contributors to Fund performance over the period have been Ocado, Upwork and Codexis. Ocado, the UK pioneer of online delivery and fulfilment for groceries, has contended with a challenging operating environment where inflation and recessionary fears have decreased consumer demand and increased sensitivity to pricing. Despite this, their international solutions division has made good progress, signing a deal with a new South Korean retailer and opening new facilities with pre-existing partners. We continue to see Ocado as one of the UK's most exciting tech companies, offering a truly innovative solution with a significant runway for growth. Upwork is an online jobs platform helping businesses engage with freelance talent. The fall in share price has primarily reflected concerns of an upcoming recession, and the lay-offs among tech companies, reducing the demand for Upwork's job-placement services. The company has responded by seeking cost savings through workforce reductions and halting brand media spend. We view these steps as prudent but will continue to monitor the business's progress. Shares in Codexis, a leading protein engineering company, have been weak since the company announced the loss of a critical order for a Covid-19 treatment. Overall, we see the enduring appeal in the holding, believing their capabilities to be unmatched, and several attractive growth avenues remaining.

The top contributors have been Alnylam Pharmaceuticals, Axon Enterprise and Staar Surgical. Alnylam Pharmaceuticals, a US biotech company developing RNA interference treatments for disease-causing genes, has had a stellar 12 months. It's had several treatments make good progress through trials and approvals. While their treatments already in the market are gaining commercial traction, the company is set to generate more than \$1 billion revenue in 2023. We, however, believe there is much more to come and view their outstanding clinical pipeline as the most varied and attractive we've encountered. Axon Enterprise, a US law enforcement technology solutions provider, was another major contributor. The firm's robust 2022 operational results, which exceeded market expectations, buoyed the share price. Revenues rose, driven by impressive growth

in the US market and increased demand for its premium offerings. Holdings in Staar Surgical, a US manufacturer of lenses for correcting refractive eyesight errors, further contributed to relative performance. The company has recorded strong growth for its vision correction lens, notably in China. It's also received approval to launch in the US, which could be transformational for the business. We are confident the firm is well placed to capitalise on the significant structural growth opportunities in worldwide myopia markets.

Notable Transactions

Over the period, the Fund took initial positions in seven companies; Akili, Beam Therapeutics, Doximity, Fiverr, QuantumScape, TransMedics, and Twist Bioscience. Over the same period, holdings in 20 companies were sold entirely. The most significant of these were the sales of Tesla, Galapagos and Baozun.

¹The Fund incurs broker commission and transfer taxes/stamp duty as a necessary part of buying and selling the Fund's underlying investments in order to achieve the investment objective. In the case of shares; broker commissions, transfer taxes and stamp duty may be paid by the Fund on transactions.

A dilution adjustment is made whenever dealings in the shares of the Fund result in shares being issued or cancelled by the Company. The adjustment will take account of any spread between the buying and selling prices of the Fund's investments and the costs (which may include dealing charges and taxes) of acquiring or disposing of such investments. Please note that the direct transaction cost disclosures above do not include the dilution adjustment charges. For further details on dilution adjustment charges please see the General Information section. For further details on the costs associated with investing in the Fund please see the Enhanced Disclosure of Fund Costs and Charges document and Baillie Gifford's Funds Costs and Charges Summary, both of which are available on the website www.bailliegifford.com.

The Fund incurs broker commission and transfer taxes/stamp duty as a necessary part of buying and selling the Fund's underlying investments in order to achieve the investment objective. In the case of shares; broker commissions, transfer taxes and stamp duty may be paid by the Fund on transactions.

Dilution adjustment charges, which do not form part of the direct transaction costs disclosures above, may be incurred as a result of trading in underlying Funds. For further details on dilution adjustment charges please see the General Information section.

Dealing spread is the difference in the buying and selling prices of the underlying investments. Dealing spreads vary considerably depending on the transaction value and market sentiment. The Fund may have holdings in single priced funds. The notional spread on these holdings is not included in the average dealing spread calculated for this Fund.

3 Revenue

Non-audit fees paid to auditors	1	1
Professional fees	1	7
	8	15
Total expenses	7,570	14,188

5 Taxation

	2023	2022
	£'000	£'000
Analysis of charge in the year		
Corporation tax	-	-
Overseas tax	74	56
Prior year tax reclaims written off	12	-
Total taxation	86	56

The Fund is subject to corporation tax at 20% (2022: 20%), however, the majority of dividends received by the Fund are not liable to corporation tax. Accordingly, the tax deductible expenses substantially exceed the taxable income of the Fund and, as a result, there is no corporation tax charge.

At 30 April 2023, the Fund had excess management expenses of £54,310,000 (2022: £46,812,000) which have not been recognised as a deferred tax asset. This is because the Fund is not expected to generate taxable income in a future period in excess of the deductible expenses of that future period and, accordingly, the Fund is unlikely to be able to reduce future tax liabilities through the use of existing excess expenses.

Notes to the Financial Statements cont.

5 Taxation (continued)

The tax charge is explained as follows:

	2023	2022
	£'000	£'000
Net expense before taxation	(6,552)	(13,051)
Net expense before taxation multiplied by the standard rate of corporation tax of 20% (2022: 20%)	(1,310)	(2,610)
Effects of:		
Non-taxable UK dividends	(92)	(125)
Non-taxable overseas dividends	(97)	(102)
Other income not subject to tax	(1)	-
Overseas tax on dividends	74	56
Excess management expenses	1,500	2,837
Prior year tax reclaims written off	12	-
Total taxation	86	56

6 Distributions

11 Related party transactions

Baillie Gifford & Co Limited, as ACD, is regarded as a related party by virtue of the services provided to the Company. Baillie Gifford & Co Limited acts as principal in respect of all transactions of shares in the Company, except where stocks are transferred on the issue or cancellation of shares. The aggregate monies received through issue and paid on cancellation are disclosed in the Statement of Change in Net Assets Attributable to Shareholders. Amounts receivable and payable on the issue and cancellation of shares have been disclosed in notes 8 and 10 respectively.

Amounts paid to Baillie Gifford & Co Limited in respect of ACD fees are disclosed in note 4 with amounts due at the year end given in note 10.

BAILLIE GIFFORD

Baillie Gifford Japanese Fund

a sub-fund of Baillie Gifford Overseas Growth Funds ICVC

*Annual Report & Financial Statements
for the year ended 30 April 2023*

Baillie Gifford Japanese Fund

Investment Objective

The Fund aims to outperform (after deduction of costs) the TOPIX, as stated in sterling, by at least 1.5% per annum over rolling five-year periods.

Investment Policy

The Fund will invest at least 90% in shares of Japanese companies of any size and in any sector. Japanese companies are companies which are listed, incorporated, domiciled or conduct a significant portion of their business in Japan. The Fund may also invest in other transferable securities of Japanese companies and money market instruments. The Fund will be actively managed.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Market conditions can change rapidly and a fund in any rank can lose you your investment. The Fund is classified as above as it invests in company shares.

The indicator does not take into account the following relevant material risks:

Over shorter time periods the Fund's share price can be volatile and returns can be much higher or lower than our five-year average target. There is no guarantee this objective will be achieved over any time period.

In adverse market conditions it may be difficult to sell investments held by the Fund in a timely manner and their value may fall significantly. This could affect how much money you receive and even delay the selling of your shares if dealing in the Fund is suspended.

Custody of assets involves a risk of loss if a custodian becomes insolvent or breaches duties of care.

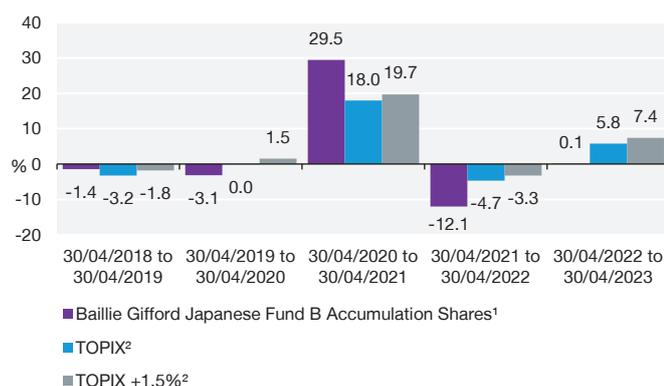

You could lose your investment due to global factors like natural disasters, pandemics, or through developments such as military conflict, or changes in government policies.

Where possible, charges are taken from income. If insufficient, the rest will be taken from capital, reducing the capital value of the Fund.

For a more detailed explanation of the risks, please see the "Risk Warnings" section of the prospectus.

Investment Report

Past Performance

The performance figures shown in this graph are for Class B Accumulation Shares. Performance figures reflect the annual management charge of 0.60%. Performance for the other share classes in issue can be obtained by contacting Client Relations. You should be aware that past performance is not a guide to future performance.

Past Performance

The investment objective of the Fund is to outperform (after deduction of costs) the TOPIX (the 'Index') by at least 1.5% per annum (the 'target return') over rolling five-year periods. For the year to 30 April 2023 the return on B Accumulation Shares was 0.1%³ compared to the Index of 5.8%² and the target return of 7.4%². We fully appreciate that this is tough whether you are a longstanding client or a newer investor in the Fund. While periods of underperformance are inevitable given our style of investment, none of us enjoy these. That said, we believe that short-term performance measurements are of limited relevance in assessing investment ability and would suggest that five years is a more sensible timeframe over which to judge performance. Over that period, the annualised return on B Accumulation Shares was 1.7%³ compared to the Index of 2.9%² and the target return of 4.4%². It is disappointing that over this period the Fund has underperformed its target return. Returns have been impacted by recent, short-term weakness.

Market Environment

Inflationary concerns, rate rises, and the financial fallout of tighter conditions have stirred global markets over the last twelve months. These factors have accelerated a style shift towards areas of perceived safety, sucking capital away from some of Japan's most promising growth opportunities.

As a net importer of energy, Japan has not been immune to these external price pressures, with inflation breaking past the Bank of Japan's (BoJ) target of 2% during the year. Believing that this was an ephemeral issue - that the country had not broken its three-decade spell of flat prices - the central bank decided to stick to its distinctively dovish monetary policy, in stark contrast to tightening seen elsewhere in the world. The yen, in response, fell to its lowest level in over two decades, exacerbating imported inflation but aiding exporters in the process.

As the calendar year came to a close, the central bank relaxed one of its policy tools, which was widely seen as the start of the end of Japan's six-year experiment with negative interest rates. The currency subsequently

¹Source: FE, 10am dealing prices, income accumulated. ²Source: Revolution and TOPIX, total return in sterling terms. The target return outperformance is compounded daily therefore the Index return plus the outperformance will not equal the target return. Please see Disclaimer on page 281 ³Source: Baillie Gifford & Co Limited, 10am dealing prices, income accumulated. You should be aware that past performance is not a guide to future performance.

Investment Report cont.

regained some ground as analysts pondered policy prospects under the newly promoted BoJ governor Kazuo Ueda. Tentative signs of inflation becoming more embedded within the economy has also fed through, with wage inflation reaching its highest since 1993. The country's potential escape from its deflationary past presents a huge opportunity. For 30 years, corporates have delayed investment and consumers have put off purchases, handicapping the country's productive capacity. The advent of real wage growth could reverse this cycle and augur well for Japan's equity market.

In other encouraging news, Covid-19 related restrictions have been widely lifted, allowing consumption and travel within the region to resume. Corporates have also accelerated the rate in which they return excess capital, with buybacks reaching another record for the fiscal year.

Performance

The broader reopening that Japan, and its neighbours, have experienced has helped the prospects of our robotic and manufacturing businesses, such as FANUC, the world's largest robotic company, and DMG Mori, a leading global machine tool maker, on the assumption that it will trigger greater capital expenditure. Many have also benefited from improved prospects in China. Financials, such as Sumitomo Mitsui Trust, which is less reliant on net interest income and more exposed to fee-based income sources of revenue, such as asset management services; the Bank of Kyoto, which is not a conventional bank due to its large investment portfolio of Kyoto-based companies; and MS&AD Insurance, an oligopolistic insurer, have also helped performance, as the market prices in a better operating environment on higher rates. Finally, trading companies, such as Mitsui, have also helped as commodity prices climbed higher.

Internet conglomerate Rakuten has remained a detractor from performance on rising concerns over the roll-out of its telecommunications business. We remain excited by its prospects, given the success of its fintech and ecommerce businesses, and on the prospect of group synergies being realised. Online media, advertising and gaming company CyberAgent was also weak, as group

profitability has fallen on declining gaming revenue and heavy content spend on its media business. We continue to believe this company's unparalleled position within three complementary industries will deliver significant returns in the long-term.

Notable Transactions

During the period we added five new companies to the Fund. Including Freee, a provider of cloud-based accountancy software, which has aligned founder-led management, attractive financial characteristics, and an appealing upside as a result of the recent sell-off in high-growth stocks; Z Holdings, the result of the merger of Yahoo Japan (one of Japan's leading online media and ecommerce businesses) and Line (the dominant online messaging platform in Japan). It also has a stake in PayPay, the leading e-money platform in Japan, all of which, when combined creates a formidable online presence that we believe the market is underappreciating; MonotaRO, which sells a wide range of different types of MRO (maintenance, repair and operation) products online in a far more efficient manner than industry incumbents; Nihon M&A, an advisory boutique that is capitalising on the country's demographic issue by addressing the succession issue of its ageing founders; and Pigeon a manufacturer of baby-related goods, that is primed for broader Asian premiumisation.

These positions were funded from the complete sale of INPEX, Japan's largest oil and gas exploration company, which was sold on concerns over the long-term sustainability of extracting hydrocarbons and on questions arising from its capital allocation. We also sold Lifull, which operates a website that aggregates real estate advertisements, on rising doubts over management competence and on the realisation that the competitive gap with its closest peer Suumo (subsidiary of Recruit) might be closing.

¹The Fund incurs broker commission and transfer taxes/stamp duty as a necessary part of buying and selling the Fund's underlying investments in order to achieve the investment objective. In the case of shares; broker commissions, transfer taxes and stamp duty may be paid by the Fund on transactions.

A dilution adjustment is made whenever dealings in the shares of the Fund result in shares being issued or cancelled by the Company. The adjustment will take account of any spread between the buying and selling prices of the Fund's investments and the costs (which may include dealing charges and taxes) of acquiring or disposing of such investments. Please note that the direct transaction cost disclosures above do not include the dilution adjustment charges. For further details on dilution adjustment charges please see the General Information section. For further details on the costs associated with investing in the Fund please see the Enhanced Disclosure of Fund Costs and Charges document and Baillie Gifford's Funds Costs and Charges Summary, both of which are available on the website www.bailliegifford.com.

The Fund incurs broker commission and transfer taxes/stamp duty as a necessary part of buying and selling the Fund's underlying investments in order to achieve the investment objective. In the case of shares; broker commissions, transfer taxes and stamp duty may be paid by the Fund on transactions.

Dilution adjustment charges, which do not form part of the direct transaction costs disclosures above, may be incurred as a result of trading in underlying Funds. For further details on dilution adjustment charges please see the General Information section.

Dealing spread is the difference in the buying and selling prices of the underlying investments. Dealing spreads vary considerably depending on the transaction value and market sentiment. The Fund may have holdings in single priced funds. The notional spread on these holdings is not included in the average dealing spread calculated for this Fund.

Other expenses:		
Audit fee	6	6
Total expenses	14,240	18,776

5 Taxation

	2023	2022
	£'000	£'000
Analysis of charge in the year		
Corporation tax	-	-
Overseas tax	6,821	7,712
Total taxation	6,821	7,712

The Fund is subject to corporation tax at 20% (2022: 20%), however, the majority of dividends received by the Fund are not liable to corporation tax. Accordingly, the tax deductible expenses substantially exceed the taxable income of the Fund and, as a result, there is no corporation tax charge.

At 30 April 2023, the Fund had excess management expenses of £130,010,000 (2022: £115,771,000) which have not been recognised as a deferred tax asset. This is because the Fund is not expected to generate taxable income in a future period in excess of the deductible expenses of that future period and, accordingly, the Fund is unlikely to be able to reduce future tax liabilities through the use of existing excess expenses.

Notes to the Financial Statements cont.

5 Taxation (continued)

The tax charge is explained as follows:

	2023	2022
	£'000	£'000
Net revenue before taxation	53,828	58,343
Net revenue before taxation multiplied by the standard rate of corporation tax of 20% (2022: 20%)	10,766	11,669
Effects of:		
Non-taxable overseas dividends	(13,614)	(15,424)
Other income not subject to tax	-	-
Overseas tax on dividends	6,821	7,712
Excess management expenses	2,848	3,755
Total taxation	6,821	7,712

6 Distributions

11 Related party transactions

Baillie Gifford & Co Limited, as ACD, is regarded as a related party by virtue of the services provided to the Company. Baillie Gifford & Co Limited acts as principal in respect of all transactions of shares in the Company, except where stocks are transferred on the issue or cancellation of shares. The aggregate monies received through issue and paid on cancellation are disclosed in the Statement of Change in Net Assets Attributable to Shareholders. Amounts receivable and payable on the issue and cancellation of shares have been disclosed in notes 8 and 10 respectively.

Amounts paid to Baillie Gifford & Co Limited in respect of ACD fees are disclosed in note 4 with amounts due at the year end given in note 10.

BAILLIE GIFFORD

Baillie Gifford Japanese Smaller Companies Fund

a sub-fund of Baillie Gifford Overseas Growth Funds ICVC

*Annual Report & Financial Statements
for the year ended 30 April 2023*

Baillie Gifford Japanese Smaller Companies Fund

Investment Objective

The Fund aims to outperform (after deduction of costs) the MSCI Japan Small Cap Index, as stated in sterling, by at least 1.5% per annum over rolling five-year periods.

Investment Policy

The Fund will invest at least 90% in shares of Japanese companies in any sector. Japanese companies are companies which are listed, incorporated, domiciled or conduct a significant portion of their business in Japan. The Fund will generally invest in smaller companies, being a company that has either a market capitalisation or turnover of less than ¥150 billion at the time of initial purchase. The Fund may also invest in other transferable securities of Japanese companies and money market instruments. The Fund will be actively managed.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Market conditions can change rapidly and a fund in any rank can lose you your investment. The Fund is classified as above as it invests in company shares.

The indicator does not take into account the following relevant material risks:

Over shorter time periods the Fund's share price can be volatile and returns can be much higher or lower than our five-year average target. There is no guarantee this objective will be achieved over any time period.

In adverse market conditions it may be difficult to sell investments held by the Fund in a timely manner and their value may fall significantly. This could affect how much money you receive and even delay the selling of your shares if dealing in the Fund is suspended.

Custody of assets involves a risk of loss if a custodian becomes insolvent or breaches duties of care.

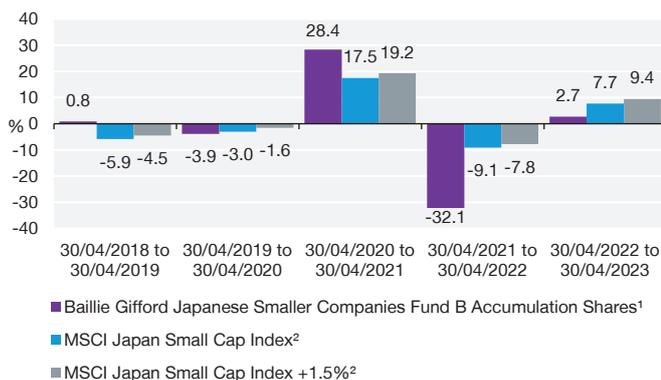

You could lose your investment due to global factors like natural disasters, pandemics, or through developments such as military conflict, or changes in government policies.

Where possible, charges are taken from income. If insufficient, the rest will be taken from capital, reducing the capital value of the Fund.

For a more detailed explanation of the risks, please see the "Risk Warnings" section of the prospectus.

Investment Report

Past Performance

The performance figures shown in this graph are for Class B Accumulation Shares. Performance figures reflect the annual management charge of 0.60%. Performance for the other share classes in issue can be obtained by contacting Client Relations. You should be aware that past performance is not a guide to future performance.

Performance

The investment objective of the Fund is to outperform (after deduction of costs) the MSCI Japan Small Cap Index (the 'Index') by at least 1.5% per annum (the 'target return') over rolling five-year periods. For the year to 30 April 2023 the return on B Accumulation Shares was 2.7%³ compared to the Index of 7.7%² and the target return of 9.4%². We fully appreciate that this is tough whether you are a longstanding client or a newer investor in the Fund. While periods of underperformance are inevitable given our style of investment, none of us enjoy these. That said, we believe that short-term performance measurements are of limited relevance in assessing investment ability and would suggest that five years is a more sensible timeframe over which to judge performance. Over that period, the annualised return on B Accumulation Shares was -2.8%³ compared to the Index of 1.0%² and the target return of 2.5%². It is disappointing that over this period the Fund has underperformed its target return. Returns have been impacted by recent, short-term weakness.

Market Environment

Inflationary concerns, rate rises, and the financial fallout of tighter conditions have stirred global markets over the last twelve months. These factors have accelerated a style shift towards areas of perceived safety, sucking capital away from some of Japan's most promising growth opportunities.

As a net importer of energy, Japan has not been immune to these external price pressures, with inflation breaking past the Bank of Japan's (BoJ) target of 2% during the year. Believing that this was an ephemeral issue - that the country had not broken its three-decade spell of flat prices - the central bank decided to stick to its distinctively dovish monetary policy, in stark contrast to tightening seen elsewhere in the world. The yen, in response, fell to its lowest level in over two decades, exacerbating imported inflation but aiding exporters in the process.

As the calendar year came to a close, the central bank relaxed one of its policy tools, which was widely seen as the start of the end of Japan's six-year experiment with negative interest rates. The currency subsequently

¹Source: FE, 10am dealing prices, income accumulated. ²Source: Revolution and MSCI, total return in sterling terms. The target return outperformance is compounded daily therefore the Index return plus the outperformance will not equal the target return. Please see Disclaimer on page 281. ³Source: Baillie Gifford & Co Limited, 10am dealing prices, income accumulated. You should be aware that past performance is not a guide to future performance.

Investment Report cont.

regained some ground as analysts pondered policy prospects under the newly promoted BoJ governor Kazuo Ueda. Tentative signs of inflation becoming more embedded within the economy has also fed through, with wage inflation reaching its highest since 1993. The country's potential escape from its deflationary past presents a huge opportunity. For 30 years, corporates have delayed investment and consumers have put off purchases, handicapping the country's productive capacity. The advent of real wage growth could reverse this cycle and augur well for Japan's equity market.

In other encouraging news, Covid-19 related restrictions have been widely lifted, allowing consumption and travel within the region to resume. Corporates have also accelerated the rate in which they return excess capital, with buybacks reaching another record for the fiscal year.

Performance

A relaxation of mobility restrictions across the region, and expectations for higher consumption from pent-up savings, has helped the prospects of several of our holdings including Yonex, Descente and MatsukiyoCocokara. Yonex, a leading badminton racket manufacturer, has experienced a re-appraisal of its revenue potential since the Chinese market – which encompasses over half of the world's badminton population – has reopened. Descente, another sporting goods manufacturer with well-known brands like Descente, Le Coq Sportif, and Umbro, that has a tie-up with Anta Sports (China's largest sportswear brand) is equally poised to re-capture the recovery in Chinese consumption. MatsukiyoCocokara, Japan's largest convenience store chain is expected to be a big beneficiary of inbound tourism and has already seen a marked increase in same-store sales. Istyle, the company behind the @Cosme review site and retail store is also worthy of note after its shares re-rated on Amazon's announcement that it was buying a stake as a way of gaining a foothold in the country's attractive cosmetic market.

Weaker performance came from our overweight positions in companies such as Infomart which connects restaurants with suppliers online, boutique advisory business Nihon M&A and robowealth advisor WealthNavi. The Covid-19 pandemic caused a drastic decrease in end-demand for Infomart. However, we now expect their sales to recover as restaurants reopen, and for higher profitability as the company uses its dominant market position to push through higher prices. The weak performance of Nihon M&A was due to the premature recognition of deals before completion. We are confident that this issue has been rectified; compliance procedures have been tightened and the culture has been changed. As such, we anticipate deals will rebound in the coming year. Finally, WealthNavi's share price fell on concerns over its separation from SBI Holdings. However, these worries appear unfounded, as recent reports show that the company has continued to grow its user base and assets under management.

Notable Transactions

During the period we acquired eight new companies: GMO Financial Gate, an offline payments provider that will likely accelerate that transition away from cash towards digital payments; Nittoku, a coil winding machine maker that will benefit from increased end-demand due to the electrification of autos and 5G technology; Avex is a music entertainment business that strengthened its balance sheet during the pandemic and is primed from the reopening; LITALICO, which provides training and employment assistance services for disabled people and is set to benefit from government initiatives aimed at improving access to employment; SpiderPlus a company that aims to digitalise Japan's construction industry; Kohoku Kogyo a leading global manufacturer of lead terminals for capacitors and optical isolators for undersea cables, with growth driven by the demand for battery electric vehicles and greater global connectivity; I-ne a small Osaka-based cosmetics company with a high market share and brand recognition for its female hair care range, with good growth prospects due to a unique Artificial Intelligence (AI) led product development

Investment Report cont.

model; and Vector, Japan's number-one PR agency that is rapidly expanding into new advertising verticals to address a market six-times larger than traditional PR.

These were funded from the sale of biotech business Healios which suffered a significant failure in one of its recent trials which we viewed as crucial to the long-term investment case; and mobile games developer Gumi, which has been unsuccessful in creating further hit games despite heavy investments into both internal development as well as external start-ups. We also sold CyberAgent which has been a successful investment, delivering an almost five-fold return since its purchase in 2013. However, we now believe momentum is slowing down and therefore used the capital to fund higher-conviction positions. Calbee, another successful long-term holding, was also sold on doubts surrounding its prospects for further future success.

¹The Fund incurs broker commission and transfer taxes/stamp duty as a necessary part of buying and selling the Fund's underlying investments in order to achieve the investment objective. In the case of shares; broker commissions, transfer taxes and stamp duty may be paid by the Fund on transactions.

A dilution adjustment is made whenever dealings in the shares of the Fund result in shares being issued or cancelled by the Company. The adjustment will take account of any spread between the buying and selling prices of the Fund's investments and the costs (which may include dealing charges and taxes) of acquiring or disposing of such investments. Please note that the direct transaction cost disclosures above do not include the dilution adjustment charges. For further details on dilution adjustment charges please see the General Information section. For further details on the costs associated with investing in the Fund please see the Enhanced Disclosure of Fund Costs and Charges document and Baillie Gifford's Funds Costs and Charges Summary, both of which are available on the website www.bailliegifford.com.

Average portfolio dealing spread	0.14	0.18

The Fund incurs broker commission and transfer taxes/stamp duty as a necessary part of buying and selling the Fund's underlying investments in order to achieve the investment objective. In the case of shares; broker commissions, transfer taxes and stamp duty may be paid by the Fund on transactions.

Dilution adjustment charges, which do not form part of the direct transaction costs disclosures above, may be incurred as a result of trading in underlying Funds. For further details on dilution adjustment charges please see the General Information section.

Dealing spread is the difference in the buying and selling prices of the underlying investments. Dealing spreads vary considerably depending on the transaction value and market sentiment. The Fund may have holdings in single priced funds. The notional spread on these holdings is not included in the average dealing spread calculated for this Fund.

3 Revenue

	2023	2022
	£'000	£'000
Overseas dividends	7,158	9,107
Other income	2	-
Total revenue	7,160	9,107

Notes to the Financial Statements cont.

4 Expenses

	2023	2022
	£'000	£'000
Payable to the ACD, associates of the ACD and agents of either of them:		
Annual management charge	2,355	4,830
Payable to the Depositary, associates of the Depositary and agents of either of them:		
Depositary's fee	32	61
Bank charges	37	70
Bank overdraft interest	9	19
	78	150
Other expenses:		
Audit fee	6	8
Professional fees	-	7
Total expenses	2,439	4,995

5 Taxation

	2023	2022
	£'000	£'000
Analysis of charge in the year		
Corporation tax	-	-
Overseas tax	716	911
Total taxation	716	911

The Fund is subject to corporation tax at 20% (2022: 20%), however, the majority of dividends received by the Fund are not liable to corporation tax. Accordingly, the tax deductible expenses substantially exceed the taxable income of the Fund and, as a result, there is no corporation tax charge.

At 30 April 2023, the Fund had excess management expenses of £30,212,000 (2022: £27,774,000) which have not been recognised as a deferred tax asset. This is because the Fund is not expected to generate taxable income in a future period in excess of the deductible expenses of that future period and, accordingly, the Fund is unlikely to be able to reduce future tax liabilities through the use of existing excess expenses.

Notes to the Financial Statements cont.

5 Taxation (continued)

The tax charge is explained as follows:

	2023	2022
	£'000	£'000
Net revenue before taxation	4,721	4,112
Net revenue before taxation multiplied by the standard rate of corporation tax of 20% (2022: 20%)	944	822
Effects of:		
Non-taxable overseas dividends	(1,431)	(1,821)
Other income not subject to tax	-	-
Overseas tax on dividends	716	911
Excess management expenses	487	999
Total taxation	716	911

6 Distributions

	2023	2022
	£'000	£'000
Final to 30 April	3,273	2,762
Amounts deducted on cancellation of shares	809	558
Amounts added on issue of shares	(75)	(79)
Total distributions	4,007	3,241

The distributions take account of revenue transactions on the issue and cancellation of shares. Details of the distributions per share are set out in the Distribution Table.

7 Reconciliation of net revenue to net distributions for the year

	2023	2022
	£'000	£'000
Net revenue after taxation for the year	4,005	3,201
Add capital transfers for deficits of income	2	40
Add distributable revenue brought forward	-	-
Less distributable revenue carried forward	-	-
Net distributions for the year	4,007	3,241

Notes to the Financial Statements cont.

Due to the Depositary or associates	12	14
Other accrued expenses	8	8
Total other creditors	5,010	20,006

11 Related party transactions

Baillie Gifford & Co Limited, as ACD, is regarded as a related party by virtue of the services provided to the Company. Baillie Gifford & Co Limited acts as principal in respect of all transactions of shares in the Company, except where stocks are transferred on the issue or cancellation of shares. The aggregate monies received through issue and paid on cancellation are disclosed in the Statement of Change in Net Assets Attributable to Shareholders. Amounts receivable and payable on the issue and cancellation of shares have been disclosed in notes 8 and 10 respectively.

Amounts paid to Baillie Gifford & Co Limited in respect of ACD fees are disclosed in note 4 with amounts due at the year end given in note 10.

Notes to the Financial Statements cont.

BAILLIE GIFFORD

Baillie Gifford Pacific Fund

a sub-fund of Baillie Gifford Overseas Growth Funds ICVC

*Annual Report & Financial Statements
for the year ended 30 April 2023*

Baillie Gifford Pacific Fund

Investment Objective

The Fund aims to outperform (after deduction of costs) the MSCI AC Asia ex Japan Index, as stated in sterling, by at least 2% per annum over rolling five-year periods.

Investment Policy

The Fund will invest at least 90% directly or indirectly in shares of companies of any size and in any sector in Asia (excluding Japan) and Australasia. The Fund will invest in companies which are listed, incorporated, domiciled or conducting a significant portion of their business in Asia (excluding Japan) and Australasia. The indirect investment will be through collective investment schemes. The Fund may also invest in other transferable securities of companies in Asia (excluding Japan) and Australasia as well as money market instruments. The Fund will be actively managed.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Market conditions can change rapidly and a fund in any rank can lose you your investment. The Fund is classified as above as it invests in company shares.

The indicator does not take into account the following relevant material risks:

Over shorter time periods the Fund's share price can be volatile and returns can be much higher or lower than our five-year average target. There is no guarantee this objective will be achieved over any time period.

Investing in China may harm your investment due to difficulties with market volatility, political and economic instability including the risk of market shutdown, trading, liquidity, settlement, corporate governance, regulation, legislation and taxation.

In adverse market conditions it may be difficult to sell investments held by the Fund in a timely manner and their value may fall significantly. This could affect how much money you receive and even delay the selling of your shares if dealing in the Fund is suspended.

Custody of assets involves a risk of loss if a custodian becomes insolvent or breaches duties of care.

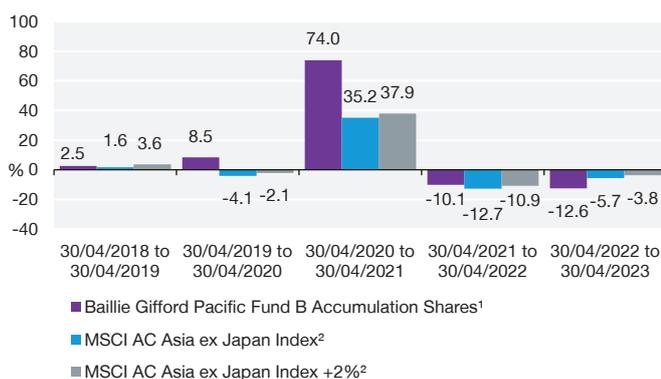

You could lose your investment due to global factors like natural disasters, pandemics, or through developments such as military conflict, or changes in government policies.

Where possible, charges are taken from income. If insufficient, the rest will be taken from capital, reducing the capital value of the Fund.

For a more detailed explanation of the risks, please see the "Risk Warnings" section of the prospectus.

Investment Report

Past Performance

The performance figures shown in this graph are for Class B Accumulation Shares. Performance figures reflect the annual management charge of 0.65%. Performance for the other share classes in issue can be obtained by contacting Client Relations. You should be aware that past performance is not a guide to future performance.

Performance

The investment objective of the Fund is to outperform (after deduction of costs) the MSCI AC Asia ex Japan Index (the 'Index') by at least 2% per annum (the 'target return') over rolling five-year periods. For the year to 30 April 2023 the return on B Accumulation Shares was -12.6%³ compared to the Index of -5.7%² and the target return of -3.8%². We fully appreciate that this is tough whether you are a longstanding client or a newer investor in the Fund. While periods of underperformance are inevitable given our style of investment, none of us enjoy these. That said, we believe that short-term performance measurements are of limited relevance in assessing investment ability and would suggest that five years is a more sensible timeframe over which to judge performance. Over that period, the annualised return on B Accumulation Shares was 8.7%³ compared to the Index of 1.7%² and the target return of 3.7%².

Market Environment

Investors could be forgiven for losing patience with an asset class that has produced plenty of volatility but little in the way of excess returns over the last decade. Globally, markets continue to contend with Russia's invasion of Ukraine and its ramifications, and the pace and magnitude of the Federal Reserve's interest rate rises (and the risk of a US recession).

The relatively modest financial stimulus and the monetary response observed across emerging Asia in response to the pandemic stands in stark contrast to the many trillions of US dollars desperately deployed by western economies. For much of the developed world, we worry that such profligacy will be a financial burden for years to come, leading to slower growth and unforeseen issues. In contrast, therefore, we view emerging Asia as an attractive alternative for capital flows. At the start of 2023, we've seen the impact of interest rate rises devastating some western banks. As confidence in their health has waned, there's been a run on their deposits and rapid Government intervention as a result.

¹Source: FE, 10am dealing prices, income accumulated. ²Source: Revolution and MSCI, total return in sterling terms. The target return outperformance is compounded daily therefore the Index return plus the outperformance will not equal the target return. Please see Disclaimer on page 281. ³Source: Baillie Gifford & Co Limited, 10am dealing prices, income accumulated. You should be aware that past performance is not a guide to future performance.

Investment Report cont.

Compare this with much of Asia and the picture looks rather different. The problems we've seen in developed market financials have stemmed from a rapid move away from ZIRP (zero interest rate policy) to higher interest rates and the resultant impact of increasingly mismatched positions within some banks. In emerging Asia, most banks have been operating against a different backdrop for some time, where rates have been both structurally higher and more volatile.

Performance

Much of what happened over the last year or so has been detrimental to growth stocks and it has been a weak year for performance. The Fund has underperformed in both absolute and relative terms. That said, our investment horizon remains five years and we do take comfort from the fact that the operational performance across the majority of the Fund's holdings has been strong.

A top contributor to relative returns over the period includes Zijin Mining (Zijin). Zijin is China's largest miner of gold and copper. 2022 revenue grew by 20% year-over-year and net profit grew by 28%, a record high. We believe Zijin is set to benefit from the supply-demand imbalance in metals and minerals as the world pushes forward the green agenda. As a small step in the right direction, the company acknowledges various ESG concerns, and is now disclosing an additional 200+ ESG details and has set goals to achieve carbon peak before 2029 and carbon neutral before 2050.

On the other hand, JD.com (JD), one of the major ecommerce players in China, detracted from performance over the last year. Slower revenue growth and the ongoing RMB10 billion subsidy program has weighed on the share price. In a weaker macro environment, JD turned their focus to lowering costs and increasing efficiencies. Nevertheless, management expect an acceleration in top line growth in 2023 and an improvement in margins. Our thesis on the competitive advantage of this company remains largely unchanged. We believe it has a structural advantage in ecommerce logistics, as well as a reputation for quality that others cannot boast.

Notable Transactions

The new buys over the period included Silergy and Baidu.com.

Silergy has a speciality in analog chips and is a founder led company with a strong niche competitive advantage. We admire the commitment to R&D and expertise in process technology.

Baidu is China's leading search engine and has many other exciting business areas centring around its technology leadership in the Artificial Intelligence (AI) field. We believe returns to Baidu's shareholders are likely to be very attractive as the cyclical headwinds affecting its operational performance abate and the value of its assets out-with search become more apparent.

The notable complete sales over the period included ICICI Lombard and IDFC First Bank.

We sold the Fund's holding in ICICI Lombard because, while it remains the leading general insurance company in India, we are concerned about the level of price competition in its markets. This has been limiting its ability to both increase returns and grow the business at the pace that the current valuation would demand. As a consequence, we have used this as a source of funds for investments where we see more scope for upside.

We sold the holding in IDFC First Bank (IDFC) because operationally IDFC has failed to deliver the performance we had hoped for. With the merger of HDFC Bank and HDFC Limited (HDFC), we believe HDFC to be a significantly more attractive investment opportunity and have funded this from IDFC.

¹Eden Biologics Inc (formerly JHL Biotech Inc) delisted from the Taipei (Taiwanese) stock exchange on 21 February 2018. The Board of Directors were of the view that the voluntary delisting was in the best interest of the company and its shareholders; the intention was to relist on an overseas exchange at a later date. Subsequent to delisting, the company has since carved out its operations forming two separate companies, Eden Biologics Inc and Chime Biologics Ltd. Eden Biologics has been valued at the Investment Advisor's valuation using trading multiples, reflecting the trading conditions and company specific news. The company is seeking routes to raise new capital. Chime Biologics Ltd was sold by Baillie Gifford Pacific Fund during the financial year ended 30 April 2021.

All investments are listed on recognised stock exchanges and are approved securities or regulated collective investment schemes within the meaning of the FCA rules unless otherwise stated.

Figures in brackets refer to 30 April 2022.

¹Changes to methodology in the Investment Association's Guidance on Disclosure of Fund Charges and Costs (July 2020, updated January 2022) were effective from 30 June 2022 and resulted in increased ongoing charges figures for the Fund. Ongoing charges disclosures now include indirect fees associated with holding closed-ended investment funds. This does not necessarily mean that fund expenses have increased, rather that a new way of showing them has been introduced. As at April 30, 2023, the operating charges includes 0.04% of indirect costs associated with holding closed-ended investment funds.

²The Fund incurs broker commission and transfer taxes/stamp duty as a necessary part of buying and selling the Fund's underlying investments in order to achieve the investment objective. In the case of shares; broker commissions, transfer taxes and stamp duty may be paid by the Fund on transactions.

A dilution adjustment is made whenever dealings in the shares of the Fund result in shares being issued or cancelled by the Company. The adjustment will take account of any spread between the buying and selling prices of the Fund's investments and the costs (which may include dealing charges and taxes) of acquiring or disposing of such investments. Please note that the direct transaction cost disclosures above do not include the dilution adjustment charges. For further details on dilution adjustment charges please see the General Information section. For further details on the costs associated with investing in the Fund please see the Enhanced Disclosure of Fund Costs and Charges document and Baillie Gifford's Funds Costs and Charges Summary, both of which are available on the website www.bailliegifford.com.

The Fund incurs broker commission and transfer taxes/stamp duty as a necessary part of buying and selling the Fund's underlying investments in order to achieve the investment objective. In the case of shares; broker commissions, transfer taxes and stamp duty may be paid by the Fund on transactions.

Dilution adjustment charges, which do not form part of the direct transaction costs disclosures above, may be incurred as a result of trading in underlying Funds. For further details on dilution adjustment charges please see the General Information section.

Dealing spread is the difference in the buying and selling prices of the underlying investments. Dealing spreads vary considerably depending on the transaction value and market sentiment. The Fund may have holdings in single priced funds. The notional spread on these holdings is not included in the average dealing spread calculated for this Fund.

3 Revenue

	2023	2022
	£'000	£'000
UK dividends	295	205
Overseas dividends	68,625	38,912
Bank interest	549	6
Other income	9	-
Total revenue	69,478	39,123

Notes to the Financial Statements cont.

4 Expenses

	2023	2022
	£'000	£'000
Payable to the ACD, associates of the ACD and agents of either of them:		
Annual management charge	17,764	22,732
Payable to the Depositary, associates of the Depositary and agents of either of them:		
Depositary's fee	181	230
Bank charges	1,310	1,792
	1,491	2,022
Other expenses:		
Audit fee	9	9
Non-audit fees paid to auditors	28	19
Professional fees	22	36
	59	64
Total expenses	19,314	24,818

5 Taxation

	2023	2022
	£'000	£'000
Analysis of charge in the year		
Corporation tax	-	-
Overseas tax	7,776	3,661
Total taxation	7,776	3,661

The Fund is subject to corporation tax at 20% (2022: 20%), however, the majority of dividends received by the Fund are not liable to corporation tax. Accordingly, the tax deductible expenses substantially exceed the taxable income of the Fund and, as a result, there is no corporation tax charge.

At 30 April 2023, the Fund had excess management expenses of £69,398,000 (2022: £51,032,000) which have not been recognised as a deferred tax asset. This is because the Fund is not expected to generate taxable income in a future period in excess of the deductible expenses of that future period and, accordingly, the Fund is unlikely to be able to reduce future tax liabilities through the use of existing excess expenses.

Notes to the Financial Statements cont.

5 Taxation (continued)

The tax charge is explained as follows:

	2023	2022
	£'000	£'000
Net revenue before taxation	50,164	14,305
Net revenue before taxation multiplied by the standard rate of corporation tax of 20% (2022: 20%)	10,033	2,861
Effects of:		
Non-taxable UK dividends	(59)	(41)
Non-taxable overseas dividends	(13,645)	(7,781)
Other income not subject to tax	(2)	-
Overseas tax on dividends	7,776	3,661
Excess management expenses	3,673	4,961
Total taxation	7,776	3,661

6 Distributions

	2023	2022
	£'000	£'000
Final to 30 April	37,075	12,436
Amounts deducted on cancellation of shares	8,208	1,140
Amounts added on issue of shares	(2,884)	(2,804)
Total distributions	42,399	10,772

The distributions take account of revenue transactions on the issue and cancellation of shares. Details of the distributions per share are set out in the Distribution Table.

7 Reconciliation of net revenue to net distributions for the year

11 Related party transactions

Baillie Gifford & Co Limited, as ACD, is regarded as a related party by virtue of the services provided to the Company. Baillie Gifford & Co Limited acts as principal in respect of all transactions of shares in the Company, except where stocks are transferred on the issue or cancellation of shares. The aggregate monies received through issue and paid on cancellation are disclosed in the Statement of Change in Net Assets Attributable to Shareholders. Amounts receivable and payable on the issue and cancellation of shares have been disclosed in notes 8 and 10 respectively.

Amounts paid to Baillie Gifford & Co Limited in respect of ACD fees are disclosed in note 4 with amounts due at the year end given in note 10.

General Information

Dilution Adjustment

A sub-fund suffers dilution (reduction) in the value of the Scheme Property attributable to it because the actual costs of buying or selling investments for the sub-fund deviate from the mid-market values generally used in calculating the price of shares in the sub-fund. Such deviation may occur as a result of the costs (which may include dealing charges and taxes) incurred in dealing in such investments and of any spread between the buying and selling prices of such investments. It is not possible to predict accurately whether dilution is likely to occur.

The COLL Rules allow the cost of dilution to be (1) met directly from the Scheme Property attributable to the sub-fund or (2) addressed by the imposition on investors of a dilution levy on the issue by the Company, subscriptions facilitated by the ACD, cancellation by the Company or redemption by the ACD of shares in the sub-fund or (3) dealt with by means of a dilution adjustment, which is the policy which has been adopted by the ACD in relation to the sub-funds of the Company. With a view to mitigating the effects of dilution, the ACD therefore reserves the right at its sole discretion to make a dilution adjustment in the calculation of the dealing price, and thereby swing the dealing price, of shares in any sub-fund of the Company if in its opinion the existing shareholders (for net purchases of shares) or remaining shareholders (for net redemptions of shares) might otherwise be adversely affected. By 'purchases' of shares we mean issues by the Company and subscriptions facilitated by the ACD and by 'redemptions' of shares we mean cancellations by the Company and redemptions by the ACD.

The COLL Rules acknowledge that the need to make a dilution adjustment may depend on the volume of purchases of shares or redemptions of shares. Accordingly, the ACD reserves the right at its sole discretion to impose a dilution adjustment in the following circumstances:

- (a) If the sub-fund is experiencing steady decline (net outflow of investment).
- (b) If the sub-fund is experiencing steady growth (net inflow of investment).

- (c) If the sub-fund is experiencing large levels of net purchases or net redemptions relative to its size.
- (d) Where the sub-fund experiences net purchases or net redemptions on any Dealing Day exceeding a particular value or a particular percentage of the value of the sub-fund.
- (e) In any other circumstances where the ACD believes it will be in the interests of shareholders to make a dilution adjustment.

The ACD is currently of the opinion that it is in the best interests of shareholders in the Company to make a dilution adjustment whenever dealings in the shares of any sub-fund result in shares in that sub-fund being issued or cancelled by the Company. The ACD believes that this policy should result in no significant dilution occurring. The adjustment will take account of any spread between the buying and selling prices of the relevant sub-fund's investments and the costs (which may include dealing charges and taxes) of acquiring or disposing of such investments, as the case may be.

The level of the dilution adjustment is set by the ACD based on prevailing market conditions. Where liquidity is restricted and trading in size in the portfolio's investments results in significant movement in the prices of these investments the ACD may adjust the level of the dilution adjustment to protect the interests of the ongoing investors in a sub-fund. The ACD has thresholds for the sub-funds for daily net inflows or outflows of cash into or out of the sub-funds. Above these thresholds, which vary by sub-fund and according to market conditions, the ACD will increase the dilution adjustment to reflect the increased dealing costs incurred by the sub-funds as a result of larger inflows and outflows. A consequence of this policy is, however, that smaller transactions made on any day that the relevant threshold is exceeded will also trade at the price incorporating the higher adjustment and this may lead to increased dealing costs. Whether an adjustment may be necessary will depend upon the net movement into or out of a sub-fund on any given day and on the underlying market conditions on that day and it is therefore not possible to predict when an adjustment may be made.

General Information cont.

Dilution Adjustment cont.

On any Dealing Day when the Company neither issues nor cancels shares in a sub-fund the price of shares in that sub-fund will not contain any dilution adjustment.

This policy to swing the dealing price will be subject to regular review and may change. The ACD's decision on whether or not to make a dilution adjustment, and on what level of adjustment to make in particular circumstances or generally, will not prevent it from making a different decision in similar circumstances in the future.

Where a dilution adjustment is applied, it will increase the dealing price when there are net inflows into the relevant sub-fund and decrease the dealing price when there are net outflows. The dealing price of each class of share in a sub-fund will be calculated separately but any dilution adjustment will in percentage terms affect the dealing price of shares of each class identically.

On the occasions when no dilution adjustment is made there may be an adverse impact on the value of the Scheme Property attributable to the relevant sub-fund.

Stamp Duty Reserve Tax ('SDRT')

Generally, there will be no SDRT charge when shareholders surrender or redeem shares. However, where the redemption is satisfied by a non-pro rata in-specie redemption, then a charge to SDRT may apply.

Taxation Reporting

In order to fulfil its legal obligations, the ACD is required to collect and report certain information about shareholders (and in some circumstances the shareholder's controlling persons), including their identity, tax residency, tax status and financial information relating to their shareholding. Shareholders must provide the ACD with any information required to meet these obligations, and may also be asked to provide self-certifications and tax reference numbers or the equivalent. The ACD reserves the right to refuse an

application for shares or a transfer of shares until it receives a declaration as to the shareholder's tax residency or status in the form prescribed by the ACD.

The ACD is also required to provide to HMRC certain information regarding shareholders, payments made to shareholders and proceeds arising on the disposal of shares, and HMRC may pass such information on to the tax authorities of another jurisdiction.

Share Classes

The net asset value per share and the number of shares in each class are shown in the Comparative Tables sections of the relevant sub-fund. The distributions per share class are shown in the Distribution Tables. In each sub-fund all share classes have the same rights on winding up.

With effect from 1 March 2022, Class A Shares are only available to persons with a written agreement with the ACD or one of its associates. This requirement for a written agreement does not apply to those who held shares in this class as at 28 February 2022 and who will continue to hold shares in this class.

Class C Shares are only available to persons to whom an associate of the ACD provides services under an investment management agreement or who has a separate fee arrangement with the ACD or one of its associates.

Class G Shares are only available to persons who were previously investors in Baillie Gifford Emerging Markets Pension Fund (a pension fund that was a unit-linked fund of Baillie Gifford Life Limited, an associate of the ACD) and such other persons as the ACD may permit at its sole discretion.

Class W Shares are only available to persons who have, or whose agent has, a separate fee arrangement with the ACD or one of its associates in relation to the relevant Class W Shares.

The minimum lump sum investment amounts are shown in the table on page 285.

General Information cont.

Equalisation

The Company will operate grouping for equalisation. Each class of shares will operate its own equalisation account. Shares subscribed for during a distribution period are called Group 2 shares. Shares subscribed for during any previous distribution period are called Group 1 shares. Group 2 shares contain in their subscription price an amount called equalisation which represents a proportion of the net income of the sub-fund that has accrued up to the date of subscription. The amount of equalisation is averaged across all the holders of Group 2 shares and is refunded to them as part of their first distribution and is treated as a return of capital for tax purposes. Being capital it is not liable to income tax but must be deducted from the cost of the shares for capital gains tax purposes.

An “income equalisation like” mechanism will be operated by the ACD for conversions. The ACD will ensure that the mechanism is operated to ensure fair treatment of those converting their shares and other shareholders in the affected classes.

Fund Charges and Costs

For further details on the costs associated with investing in the sub-funds of the ICVC, please see the Enhanced Disclosure of Fund Costs and Charges document and Baillie Gifford’s Funds Costs and Charges Summary, both of which are available on the website www.bailliegifford.com.

Conflicts of Interest

From time to time, there may be situations that give rise to a material interest or conflict of interest. Such interests can arise between the interests of the ACD, the Investment Adviser, other persons associated with them and the interests of the sub-funds and their shareholders. A material interest or a conflict of interest can also arise between the interests of different shareholders. In such circumstances the ACD will put in place effective

organisational and administrative arrangements to manage and monitor the material interest or conflict of interest in a way that ensures shareholders are treated fairly, or where it is impractical to manage the conflict, it will be disclosed.

The ACD, the Investment Adviser and other persons associated with them may, from time to time, act as authorised corporate directors, investment managers or advisers to other persons, companies or funds which follow similar investment objectives to the sub-funds. It is therefore possible that the ACD and/or the Investment Adviser may in the course of their business have potential conflicts of interest with the Company or a particular sub-fund. Each of the ACD and the Investment Adviser will, however, have regard in such event to, amongst other things, its obligation to act in the best interests of the Company so far as practicable, having regard to its obligations to other clients, when undertaking any investment where potential conflicts of interest may arise. The Depositary may, from time to time, act as the depositary or trustee of other companies or funds.

Full details of the ACD’s conflicts of interest policy can be inspected at the offices of the ACD at Calton Square, 1 Greenside Row, Edinburgh, EH1 3AN during normal business hours.

Third Party Data Provider Disclaimer

No third party data provider (“Provider”) makes any warranty, express or implied, as to the accuracy, completeness or timeliness of the data contained herewith nor as to the results to be obtained by recipients of the data. No Provider shall in any way be liable to any recipient of the data for any inaccuracies, errors or omissions in the index data included in this document, regardless of cause, or for any damages (whether direct or indirect) resulting therefrom.

No Provider has any obligation to update, modify or amend the data or to otherwise notify a recipient thereof in the event that any matter stated herein changes or subsequently becomes inaccurate.

Third Party Data Provider Disclaimer cont.

Without limiting the foregoing, no Provider shall have any liability whatsoever to you, whether in contract (including under an indemnity), in tort (including negligence), under a warranty, under statute or otherwise, in respect of any loss or damage suffered by you as a result of or in connection with any opinions, recommendations, forecasts, judgments, or any other conclusions, or any course of action determined, by you or any third party, whether or not based on the content, information or materials contained herein.

MSCI Index Data

The MSCI information may only be used for your internal use, may not be reproduced or re-disseminated in any form and may not be used as a basis for or a component of any financial instruments or products or indices. None of the MSCI information is intended to constitute investment advice or a recommendation to make (or refrain from making) any kind of investment decision and may not be relied on as such. Historical data and analysis should not be taken as an indication or guarantee of any future performance analysis, forecast or prediction. The MSCI information is provided on an “as is” basis and the user of this information assumes the entire risk of any use made of this information. MSCI, each of its affiliates and each other person involved in or related to compiling, computing or creating any MSCI information (collectively, the “MSCI Parties”) expressly disclaims all warranties (including, without limitation, any warranties of originality, accuracy, completeness, timeliness, non-infringement, merchantability and fitness for a particular purpose) with respect to this information.

Without limiting any of the foregoing, in no event shall any MSCI Party have any liability for any direct, indirect, special, incidental, punitive, consequential (including, without limitation, lost profits) or any other damages. (www.msci.com)

S&P Index Data

The S&P 500 and S&P Global SmallCap (index) are products of S&P Dow Jones Indices LLC or its affiliates (“SPDJI”) and has been licensed for use by Baillie Gifford & Co. S&P®, S&P500®, US 500, The 500, iBoxx®, iTraxx®, and CDX® are trademarks of S&P

Global Inc, or its affiliates (“S&P”); Dow Jones® is a registered trademark of Dow Jones Trademark Holdings LLC (“Dow Jones”); and these trademarks have been licensed for use by SPDJI and sublicensed for certain purposes by Baillie Gifford & Co. Baillie Gifford & Co Product(s) are not sponsored, endorsed, sold or promoted by SPDJI, Dow Jones, S&P, their respective affiliates, and none of such parties make any representation regarding the advisability of investing in such product(s) nor do they have any liability for any errors, omissions, or interruptions of the S&P 500 and S&P Global Small Cap index.

TOPIX Index Data

(i) The TOPIX Index Value and the TOPIX Marks are subject to the proprietary rights owned by JPX Market Innovation & Research, Inc. or affiliates of JPX Market Innovation & Research, Inc. (hereinafter collectively referred to as “JPX”) and JPX owns all rights and know-how relating to TOPIX such as calculation, publication and use of the TOPIX Index Value and relating to the TOPIX Marks. JPX shall not be liable for the miscalculation, incorrect publication, delayed or interrupted publication of the TOPIX Index Value.

Taskforce on Climate-related Financial Disclosures

Following the adoption of the Taskforce on Climate-related Financial Disclosures’ (‘TCFD’) recommendations into the FCA’s ESG sourcebook, Baillie Gifford & Co Limited is required to publish its ‘TCFD entity report’ by 30 June each year, detailing how in its role as ACD it takes climate-related matters into account in managing investments on behalf of clients and consumers. The regulations also require the ACD to prepare a TCFD product report for each sub-fund on how climate-related matters are taken into account within the sub-fund, including a core set of climate-related metrics.

The reports must be made available on the ACD’s website and a clear and prominent signpost to the product report for each authorised sub-fund must be included within each set of annual and interim financial statements. The ACD has chosen a reference period

General Information cont.

Taskforce on Climate-related Financial Disclosures cont.

covering 12 months up to 31 December and will publish the reports by 30 June each year. The latest product reports covering the period up to 31 December 2022 are available on the website via this link [Literature/Individual Investors/Baillie Gifford](#).

Active Share

Active Share is a measure of how actively managed a sub-fund is and is calculated by taking 100 minus the % of the sub-fund that overlaps with the Target Benchmark. An Active Share of 100 indicates no overlap with the Target Benchmark and an Active Share of zero indicates a portfolio that tracks the Target Benchmark. The Active Share as at the year end and the Target Benchmark for each sub-fund is shown in the table below. The Active Share has been shown against these indices to highlight the active management style against what is deemed to be the most relevant index for each sub-fund.

Sub-fund	Active Share	Comparative Index
Baillie Gifford American Fund	93%	S&P 500 Index
Baillie Gifford China Fund	71%	MSCI China All Shares Index
Baillie Gifford Developed Asia Pacific Fund	81%	MSCI Pacific Index
Baillie Gifford Emerging Markets Growth Fund	70%	MSCI Emerging Markets Index
Baillie Gifford Emerging Markets Leading Companies Fund	71%	MSCI Emerging Markets Index
Baillie Gifford European Fund	91%	MSCI Europe ex UK Index
Baillie Gifford Global Discovery Fund	99%	S&P Global Small Cap Index
Baillie Gifford Japanese Fund	79%	TOPIX
Baillie Gifford Japanese Smaller Companies Fund	95%	MSCI Japan Small Cap Index
Baillie Gifford Pacific Fund	79%	MSCI AC Asia ex Japan Index

General Information cont.

Portfolio Turnover Ratio

Portfolio Turnover Ratio is a measure of portfolio change or trading activity in a Fund. It is calculated as the minimum of purchases and sales in a month, divided by the average market value of the Fund. The annual turnover is then calculated as the sum of the monthly turnover figures for the 12 month period.

Sub-fund	Portfolio Turnover Ratio
Baillie Gifford American Fund	10%
Baillie Gifford China Fund	19%
Baillie Gifford Developed Asia Pacific Fund	18%
Baillie Gifford Emerging Markets Growth Fund	13%
Baillie Gifford Emerging Markets Leading Companies Fund	17%
Baillie Gifford European Fund	19%
Baillie Gifford Global Discovery Fund	8%
Baillie Gifford Japanese Fund	5%
Baillie Gifford Japanese Smaller Companies Fund	21%
Baillie Gifford Pacific Fund	15%
