

Global Alpha Paris-Aligned

Net Zero Alignment Commitment

November 2022

The undernoted applies to the following vehicles:

Baillie Gifford Global Alpha Paris-Aligned Fund

The portfolio will invest primarily in shares of companies globally while considering environmental, social or governance factors that may affect sustainability of a company's profit growth. It will seek to invest in a way that is in line with the objectives of the Paris Agreement – specifically, to limit the average temperature rise to below 1.5C above pre-industrial levels.

It also aims to screen out carbon-intensive companies that do not, or will not, play a major role in our energy transition through a qualitative framework.

The portfolio will comply with the Investment Managers policy on assessing breaches of the United Nations Global Compact Principles for Business.

Specific commitments of the portfolio include:

- i. Holdings accounting for 90% of the portfolio's financed emissions* will demonstrate robust strategic alignment with appropriate 1.5C/net zero pathways by 2030. All holdings will be so-aligned by 2040. New buys will have an extra two years to meet the commitment.
- ii. Exclusion of any companies that generate more than 10% of revenues from the extraction and/or production of thermal coal, oil and/or gas, and those that generate more than 50% of revenues from services provided to these activities.
- iii. All holdings are assessed and prioritised for engagement for alignment on an ongoing basis. The highest emitters are subject to a proprietary qualitative analysis. Companies that fail this screen are excluded from the portfolio.

- iv. The portfolio commits to having a Weighted Average Greenhouse Gas Intensity (WAGHGI) lower than that of the MSCI ACWI EU Paris Aligned Requirements index. This index, which maps to the EU delegated acts on Paris-Aligned benchmarks, starts with a WAGHGI 50% less than that of the parent ACWI. It then decarbonises by at least 7% year-on-year.

Alignment will be assessed on a company-by-company basis paying due attention to the realities of specific industries and regions. We accept that overall global progress, and thus the pace of underlying company alignment, remains subject to effective policy support.

Given the flexible nature of the portfolio guidelines and the inherent subjectivity of investment analysis and decision making, there can be no assurance that this process will result either in superior investment returns, or in a positive outcome for the environment or society.

*We intend that financed emissions should encompass scopes 1, 2 and 3, but this will be kept under review as data and definitions evolve.

Risk Factors and Important Information

All investment strategies have the potential for profit and loss, your or your clients' capital may be at risk. Past performance is not a guide to future returns.

This communication contains information on investments which does not constitute independent research. Accordingly, it is not subject to the protections afforded to independent research, but is classified as advertising under Art 68 of the Financial Services Act ('FinSA') and Baillie Gifford and its staff may have dealt in the investments concerned.

All information is sourced from Baillie Gifford & Co and is current unless otherwise stated.
